

Publications of the Department of Commercial Intelligence and Statistics, India.

[Publications noted below are obtainable from the Government of India, Central Publication Branch, 8, Hastings Street, Calcutta, and all agents for the sale of Government publications. Remittances should be made by postal or money order and should include forwarding charges, as indicated in brackets after each price.]

WEEKLY.

1. Indian Trade Journal—Annual subscription (including postage): Indian R13 and Foreign R18. Single copies (excluding postage):—Current issue As. 4; Back numbers over three months old R1 each.
[Orders may be placed, with prepayment, for particular issues of the Journal, e.g., issues containing Crop Forecasts or those having special supplements.]

FORTNIGHTLY.

2. Return showing the Wholesale and Retail Prices of certain staple cereals, pulses, oilseeds, sugar (raw), salt, etc., in India by districts. As. 6. (2a.) Yearly Subscription R12. Post free.

MONTHLY.

3. Accounts relating to the Sea-borne Trade and Navigation of British India. R1-4. (4a.) Yearly Subscription R18. Post free.
4. Monthly Statistics of Cotton Spinning and Weaving in Indian Mills. As. 2. (1a.) Yearly Subscription R2-4. Post free.
5. Indian Customs Revenue. One anna. (6p.) Yearly Subscription As. 12. Post free.
6. Joint-Stock Companies registered in British India and in the Indian States of Mysore, Baroda, Travancore and Hyderabad. As. 2. (1a.) Yearly Subscription R2-4. Post free. (Supplement to the *Indian Trade Journal*.)
7. Rail-borne Trade at stations adjacent to Land Frontier routes. As. 1. (6p.) (Supplement to the *Indian Trade Journal*.)

ANNUAL.

8. Review of the Trade of India. R1-4. (4a.)
9. Accounts relating to the Sea-borne Trade of British India for the Calendar year. R1-5. (2a.)
10. Annual Statement of the Foreign Sea-borne Trade of British India:—
Vol. I.—Abstract and detailed Tables of Imports and Exports. R8-12. (R1-7.)
Vol. II.—Abstract and detailed Tables of Trade and Shipping with each country and at each port, and tables relating to the trade of Aden and of the French Possessions in India. R7-10. (R1-9.)
11. Prices and Wages in India. R2. (9a.)
12. Statistical Abstract for British India. R1-6. (10a.)
13. Agricultural Statistics of India—
Vol. I.—British India. As. 12. (4a.)
Vol. II.—Indian States. As. 12. (4a.)
14. Summary Tables of the Agricultural Statistics of British India. As. 2. (1a.) (Supplement to the *Indian Trade Journal*.)
15. Estimates of Area and Yield of Principal Crops in India. As. 9. (2a.)
16. Indian Tea Statistics. As. 2. (1a.) (Supplement to the *Indian Trade Journal*.)
17. Indian Coal Statistics. As. 9. (2a.) (Supplement to the *Indian Trade Journal*.)
18. Indian Rubber Statistics. As. 2. (1a.) (Supplement to the *Indian Trade Journal*.)
19. Indian Coffee Statistics. As. 2. (1a.) (Supplement to the *Indian Trade Journal*.)
20. Joint-Stock Companies in British India and in the Indian States of Mysore, Baroda, Gwalior, Hyderabad, Indore and Travancore. R2-6. (9a.)
21. Statistical Tables relating to Banks in India. As. 9. (3a.)
22. Statements showing progress of the Co-operative Movement in India. As. 3. (3a.)
23. Tariff Schedules—Reprint of Schedules II and III of the Indian Tariff Act, VIII of 1894 (as subsequently amended), showing the rates of Customs duties levied on goods imported into, and exported from, British India. As. 4.

MISCELLANEOUS.

24. Index Numbers of Indian Prices from 1861—1918 (with addenda for 1919, 1920, 1921, 1922, 1923 and 1924). As. 13. (3a.)
25. Crop Forecasts. (Published in the *Indian Trade Journal*.) Per copy As. 4. (1a.)
Rice—1st (October), 2nd (December), Final (February).
Wheat—1st (January), 2nd (March), 3rd (April), 4th (May), Final (August).
Cotton—1st (August), 2nd (October), 3rd (December), Final (February), Supplementary (April).
Linseed, Rape and Mustard (winter oilseeds)—1st (January), 2nd (March), Final (June).
Sesamum (til or jinjili)—1st (September), 2nd (October), Final (January), Supplementary (April).
Groundnut—1st (October), Final (February).
Indigo—1st (October), Final (December).
Sugarcane—1st (August), 2nd (October), Final (February).
26. Large Industrial Establishments in India. R4-4.
27. Registration and Publication of Statistics relating to the Sea-borne Trade and Navigation of British India. R3-2. (10a.)
28. A manual on the preparation of Crop Forecasts in India. As. 8. (2a.)
29. Cotton Map of India, No. 1—Showing the different varieties of cotton grown in the different districts and States in India. R1. (1a.)
[All communications relating to the supply on payment should be addressed to the Officer-in-charge, Map Record and Issue Office, 13, Wood Street, Calcutta.]
30. Crop Atlas of India. R6-8. (10a.)
31. Quinquennial Report on the Average Yield per Acre of principal Crops in India for the period ending 1921-22. As. 8. (3a.)
32. Report on the First Census of Live-Stock, Ploughs and Carts in India, held between December 1919 and April 1920. As. 4. (2a.)
33. Accounts relating to the Trade by Land of British India with Foreign Countries for 1924-25. R2. (2a.)
34. A Classified List of the commodities that enter into the Land Frontier Trade of British India. R1-2. (6a.)
35. Accounts of the Trade of the Portuguese Possessions in India for 1916-20 (Supplement to Vol. II of the Annual Statement of the Sea-borne Trade of British India). As. 12. (2a.)
36. Alphabetical Index of the commodities that enter into the Foreign Sea-borne Trade of British India. R7-8. (6a.)
37. Commercial Library Catalogue (corrected up to 30th April 1925). R2-8. (5a.)

INTRODUCTORY NOTE	i—ix
(1) Map of India showing the departure of area sown and that of rainfall in 1923-24 from the average of the preceding ten years	<i>Frontispiece</i>
CHARTS illustrating—	
(2) Total area sown, area under food crops, current fallows (reversed), and variations in rainfall as compared with normal	
(3) Total wheat area, unirrigated wheat area, and rainfall in wheat-growing tracts (June to February)	
(4) Total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow, and current fallows	
(5) Total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops	xi
(6) Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops	
(7) Total area sown and area under different crops	
(8) Total live-stock divided between bovine, ovine, and others	
(9) Shares of provinces in the total area under principal crops	
(10) Harvest prices of some of the principal crops	

SUMMARY TABLES

No.		
1. General summary, 1904-05 to 1923-24		2—3
2. Area cultivated and uncultivated in 1923-24		4
3. Area under irrigation in 1923-24		5
4. Area under different crops cultivated in 1923-24		6—7
5. Number of live-stock, ploughs, and carts		8—9
6. Area assessed and incidence of the land revenue assessment on area and population		10—11
7. Harvest prices of certain important crops in 1923-24		12
8. Comparative statement showing acreage under certain crops in various countries of the World in 1924		13

GENERAL TABLES

I.—Area in each province during 1919-20 to 1923-24	14—15
II.—Classification of Area in each province during 1919-20 to 1923-24	16—17
III.—Area under Irrigation in each province during 1919-20 to 1923-24	18—21
IV.—Area under crops and specification of crops in each province during 1919-20 to 1923-24	22—29
V.—Live-stock, ploughs, and carts	30—33
VI.—Incidence of the land revenue assessment on area and population	34—41
VII.—Harvest prices of certain important crops during 1919-20 to 1923-24	42—43

APPENDICES

Index	77—81

Agricultural Statistics of India

1923-24

VOLUME I—BRITISH INDIA

Introductory Note

This annual volume is the fortieth of the series started in 1886 with statistics for 1884-85. As in the previous issue, figures for twenty years are shown in Summary Table No. 1, and for five years in the provincial tables. A map showing the departure from the normal of sown area and that of rainfall in 1923-24 and other charts as detailed in the last paragraph of this note have, as usual, been incorporated in the volume. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Indian States* as far as they are reported.

The statistics are compiled from annual returns furnished by the Governments of Bengal, Bombay, the Central Provinces and Assam; the Chief Commissioner, Coorg, the Revenue Commissioner, North-West Frontier Province, the Commissioner, Ajmer-Merwara, the Commissioner of Settlements and Land Records, Burma, the Directors of Agriculture, Madras and Bihar and Orissa, the Directors of Land Records, Punjab and United Provinces; the Deputy Commissioner, Delhi, and the Political Agent in the Southern States of Central India, Manipur.

The statistics are given in seven separate tables, namely, I—Area ; II—Classification of area ; III—Area under irrigation ; IV—Area under crops ; V—Live-stock, ploughs, and carts ; VI—Land Revenue assessment ; and VII—Harvest prices. The totals of the figures given in these tables are shown in a series of summary tables, to which a table on world crops is added. In addition to these, there are four appendices, namely, Appendix A dealing with the average yields per acre of principal crops in each province †; Appendix B containing explanatory notes which are essential for the correct understanding of the different tables for the different provinces; Appendix C giving the meaning of vernacular terms used in the volume; and Appendix D containing an alphabetical list of crops cultivated in India and their classification in Table IV.

The year to which the returns relate ends on 30th June, this being the generally recognised agricultural year, except in Assam where the year ends on 31st March and in the Central Provinces and Berar on 31st May. It should, however, be borne in mind that statistics relating to areas irrigated (Table III) and areas under crops and specification of crops (Table IV) generally include both the *kharif* and the *rabi* crops, and therefore actually relate to the year ended with the harvesting of the *rabi* or spring crops.

* In Appendix A (Volume I), however, figures relating to the Mysore State are shown separately.

† These together with district figures are separately published in the Blue Book entitled 'Quinquennial Report on the average yield per acre of principal crops in India, 1921-22.'

Total area and
population of India

The total area of India is 1,817,000 * square miles, or 1,162,919,000 acres, with a population of 319 millions according to the census of 1921. This may be divided as follows :—

	Acre	Population
(1) British Provinces (including Indian States within the political jurisdiction of Local Governments and Administrations)	765,611,000	262,898,000
(2) Indian States having direct political relations with the Government of India	346,309,000	52,854,000
(3) Certain specially administered territories in the North-West Frontier Province (Tribal areas, etc.) not included under (1)	16,293,000	2,686,000
(4) British Baluchistan (including administered areas)	34,706,000	421,000
Total	1,162,919,000	318,859,000

No returns of agricultural statistics are prepared either for item (3) certain specially administered territories in the North-West Frontier Province, or for item (4) British Baluchistan.

Table I
Total area

The total area of the British Provinces (item 1 above) shown in this volume—765,611,000 acres or 1,196,000 square miles—includes 97,864,000 acres, with a population of some 17 millions, belonging to Indian States, which are within the political jurisdiction of Local Governments and Administrations. These States comprise Manipur and the Khasi and Jaintia Hill States in Assam ; Cooch Bihar and Tripura in Bengal ; the Tributary States of Orissa and Chota Nagpur in Bihar and Orissa ; Rampur, Tehri, and Benares in the United Provinces ; the Ambala Division States and the Simla Hill States in the Punjab ; the Phulera and Upper Tanawal States in the North-West Frontier Province ; the Khairpur State, the Gujarat States (excluding Baroda), the Konkan States, the Deccan States, the Satara Jagirs, and the Southern Mahratta States in Bombay ; and the Chhattisgarh States in the Central Provinces. Of these States, agricultural statistics are prepared for most of the States in the Punjab and the United Provinces, and a few States in Bombay ; but they are dealt with in Volume II. along with the States having direct political relations with the Government of India (item 2).

Thus, by deducting 97,864,000 acres belonging to Indian States from the total area of 765,611,000 acres included in British Provinces, the remainder, 667,747,000 acres, is shown in Table I, and this represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from "village papers," i.e., papers prepared by the village accountants for the purpose of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces, Madras, the Punjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The causes of this difference are : (a) while the surveyed area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail roads is not uniform in the two sets of returns. Substituting the area by village papers for the area by survey in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 664,533,000 acres, as against 667,747,000 acres according to the professional survey.

* The difference between this area and that shown in the Census report of 1921 is due mainly to the exclusion of certain tracts of Burma, especially Putao, from the Census return. A considerable part of Putao amounting to over 6 million acres is excluded from the Census report.

This area is, for the purpose of Agricultural Statistics, classified as Table II Classification of area

	Acres (1,000)	Per cent	shown in the margin. Of the area
Forests	85,979	12.9	total, 85,979,000 acres, or 13
Not available for cultivation	151,847	22.8	per cent, are occupied by
Culturable waste other than fallow	154,602	23.3	forests; and the area not
Current fallows	49,620	7.5	available for cultivation, i.e.,
Net area sown	222,485	33.5	land absolutely barren or un-
Total	664,583	100	culturable or covered by build-

ings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 151,847,000 acres or 23 per cent. The balance, 426,707,000 acres or 64 per cent, represents the area available for cultivation. Of this, 154,602,000 acres, or 23 per cent of the total area, represent culturable waste other than fallow, i.e., land available for cultivation but not taken up, and 49,620,000 acres, or 7 per cent, were kept fallow in the year of report. The net area actually sown with crops during 1923-24 was therefore 222,485,000 acres, or Net area sown

	Proportion of sown to total area	Population per 100 acres of sown area	
Delhi	61 per cent	217	33 per cent of the total area, as against 224,945,000
United Provinces	52 "	127	acres in the preceding year, or
Bihar and Orissa	46 "	138	a decrease of one per cent. The
Bengal	46 "	201	proportion of sown to total area and the number of popula-
Punjab	44 "	78	tion per 100 acres of sown area
Bombay	39 "	59	in each province are stated in
Central Provinces and Berar	38 "	57	the margin. The proportion of
Madras	36 "	131	sown to total area in the year
North-West Frontier Province	26 "	95	under review was highest in
Assam	18 "	127	Delhi and lowest in Burma.
Ajmer-Merwara and Manipur	17 "	162	This area, however, excludes
Coorg	14 "	118	areas sown more than once in
Burma	10 "	81	the year. If areas sown more than once are taken as separate areas for
British India	33 "	110	each crop, the gross sown area in the year of report amounts to 253,662,000

acres, as against 258,829,000 acres in the preceding year.

The term "forests" in the returns of Agricultural Statistics means Forests "any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may, however, be excluded from that head and entered in the column "net area sown." The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the Reports on the Administration of the Forest Department for various reasons,* the chief amongst which are (1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods, (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, and (3) certain village and other lands not covered by forests but worked by the Forest Department and returned as forest lands by that Department, are not treated as forests in the returns of Agricultural Statistics but are included under the proper heads of cultivated or uncultivated lands as the case may be. Of the total forest area (85,979,000 acres in 1923-24), 23 per cent lies in Burma, 19 per cent in the Central Provinces and Berar, 15 per cent in the Madras Presidency, 11 per cent each in the United Provinces and Bombay, and the remaining 21 per cent in the other provinces.

Most of the barren and uncultivable lands lies naturally in the hilly tracts of Burma and of southern India and in the dry and desert regions of north-western India. Burma contains 36 per cent of the total area of the head "not available for cultivation" (151,847,000 acres in 1923-24), the Madras Presidency 14 per cent, Bombay 13 per cent, and the Punjab 8 per cent.

The head "culturable waste other than fallow" shows lands available for Culturable waste cultivation but not yet taken up. It includes areas such as groves not classed in other than fallow the area sown and also areas under bamboos and thatching grass when not

* For detailed information in respect of provinces, see notes in Appendix B (Table II).

forming parts of forest areas.* Of the total culturable waste land (154,602,000 acres in 1923-24), 39 per cent is in Burma, 11 per cent in Assam, 10 per cent each in the Central Provinces and Berar and the Punjab, 8 per cent in the Madras Presidency, and the remaining 22 per cent in the other provinces.

Current fallows

The maximum period for which land left uncultivated is reckoned as fallow varies according to local laws and customs in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in the Bombay Presidency. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "culturable waste." Owing to this diversity of practice, the classification of area as "culturable waste" and "current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, six years, would be treated as fallow in the Bombay Presidency, but as culturable waste in the Punjab. The total area returned as "current fallow" in 1923-24 was 49,620,000 acres, as against 47,080,000 acres (revised) in the preceding year, or an increase of 5 per cent.

Table III
Irrigation

The total area irrigated in 1923-24 was 44,925,000 acres, as against 47,875,000 acres in the preceding year. Of this area, 19,625,000 acres were irrigated from Government canals, 3,578,000 acres from private canals, 10,758,000 acres from wells, 5,916,000 acres from tanks, and 5,048,000 acres from other sources of irrigation. In India irrigation is ordinarily resorted to on an extensive scale in tracts where the rainfall is most precarious. In Lower Burma, Assam, Eastern Bengal, and the Malabar Coast (including the Konkan),

		Proportion of irrigated to total sown area	
Punjab		49 per cent	where the rainfall is ordinarily heavy, the crops hardly need the help of irrigation, unless there is an unusual scarcity of rain. Of the total area irrigated in 1923-24, the Punjab accounted
North-West Frontier Province		37 "	for 29 per cent, the Madras Presidency
Ajmer-Merwara and Marwar		32 "	20 per cent, the United Provinces
Madras		28 "	18 per cent, Bihar and Orissa 12 per cent, Bombay 9 per cent, and the other provinces the remaining 12 per cent. The
United Provinces		22 "	proportion of irrigated to total area sown in each province is stated in the margin.
Bihar and Orissa		22 "	
Delhi		18 "	
Bombay		13 "	
Burma		9 "	
Assam		7 "	
Bengal		6 "	
Central Provinces and Berar		5 "	
Coorg		3 "	

The figures of irrigated areas do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas sown more than once as separate areas for each crop, the gross area of irrigated crops was 48,148,000 acres in 1923-24. Of this area 85 per cent was under food crops and the remainder under non-food crops. Of the former 17,299,000 acres were sown under rice, 8,552,000 acres under wheat, 2,114,000 acres under barley, 1,527,000 acres under jowar, 1,175,000 acres under bajra, 971,000 acres under maize, 1,941,000 acres under sugarcane, and the remaining 7,406,000 acres under other food crops. Of the irrigated non-food crop area 2,414,000 acres were occupied by cotton. These statistics of irrigated crops are in some cases defective as explained in the notes in Appendix B (page 58) and at the foot of Table III (pages 18-21).

Table IV
Area under crops

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops, and in these cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are framed on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements,

* For detailed information in respect of provinces, see notes in Appendix B (Table II).

is assigned to the principal crops by the village accountant. In the same province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains, and in this case the whole area of the mixed field is assigned to food-grains.

The gross area cultivated with crops covered, as stated above, nearly 254 million acres in 1923-24. The different classes of crops and the area occupied by each class are stated in the margin. Of the total sown area, food-crops occupied

Classification of area
sown

	Acre (1,000)	Per cent of total	about 207,999,000 acres or 82 per cent and non-food crops about 45,320,000 acres or 18 per cent. Of the food- crops, food-grains (cereals and pulses) covered as much as
Food-grains	197,000	77.8	
Condiments and spices	1,526	0.6	
Sugar	3,015	1.2	
Fruits and vegetables	5,210	2.0	
Miscellaneous food-crops	1,218	0.5	
Total food-crops (a)	207,999	82.1	197,000,000 acres, † or about 78 per cent of the total area sown, and other food-crops
Oilseeds	14,255	6.0	(condiments and spices, sugar, fruits and vegetables, and miscellaneous food-crops * toge- ther) some 10,999,000 acres or
Fibres	18,414	7.3	
Dyes and Tanning materials	700	0.3	
Drugs and narcotics	2,218	0.9	
Fodder crops	8,764	3.4	
Miscellaneous non-food crops	969	0.4	
Total non-food crops (a)	45,320	17.9	

only 4 per cent of the total. Of non-food crops, fibres such as cotton, jute, hemp, etc., occupied 18,414,000 acres or 7 per cent of the total area sown, and oilseeds 14,255,000 acres † or 6 per cent. The other non-food crops *—dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied some 12,651,000 acres or 5 per cent of the total.

The area under food-grains (197,000,000 acres) showed a decrease of 8,027,000 ^{Food-grains} acres or 4 per cent as compared with the preceding year. The actual increase

	1923-24	1922-23	Increase (+) or Decrease (-)	Increase (+) or Decrease (-)
	Acre (1,000)	Acre (1,000)	Acre (1,000)	Acre (1,000)

Rapo and mustard	3,652	3,809	-157	
Other oilseeds	4,723	4,577	+146	

Bihar and Orissa, 10 per cent in Burma, 9 per cent each in the Punjab and Bombay, 7 per cent in Bengal, 5 per cent in the United Provinces, † and the remaining 4 per cent in the other minor provinces.

(a) The total of food crops and non-food crops does not agree with the gross cultivated area stated above for the reasons explained in footnote (b) on page 7.

* For a list of these crops, see Appendix D.

† In the United Provinces, the whole of the area sown with food-grains mixed with oilseeds is shown under food-grains. The area included under food-grains, which was really sown with oilseeds (as a mixed crop), is roughly estimated to have been 4 million acres in the whole province in 1923-24. Excluding this area of 4 million acres under oilseeds, the total area under food-grains in British India in 1923-24 would come to 193 million acres instead of 197 million acres.

‡ The figures shown under the several heads of oilseeds in Table IV against the United Provinces represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which were thinly sown in combination with wheat, barley, gram, and other food crops. If the areas occupied by the scattered oilseeds plants were added up, it is estimated very roughly that they would amount in 1923-24 for the whole of the United Provinces to 4 million acres. Including this area, the total area under oilseeds in British India in 1923-24 would come to 18 million acres.

Condiments and
spices

The total area under condiments and spices in 1923-24 was 1,526,000 acres, as against 1,534,000 acres in the preceding year. Spices are grown mostly in the southern parts of India, the Madras Presidency alone accounting for about 47 per cent of the total area under condiments and spices in 1923-24.

Sugar

The total area occupied by sugar-yielding plants in 1923-24 was 3,045,000 acres, as against 2,855,000 acres in the preceding year, or an increase of 190,000 acres or 7 per cent. Of this area, 2,880,000 acres were under sugarcane, as against 2,688,000 acres in the preceding year. Of the sugarcane area 54 per cent was in the United Provinces, 17 per cent in the Punjab, 11 per cent in Bihar and Orissa, 7 per cent in Bengal, and 4 per cent in the Madras Presidency. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 165,000 acres as against 167,000 acres in the preceding year. Of this area the Madras Presidency accounted for 49 per cent and Bengal 35 per cent.

Fibres

Fibre crops occupied 18,414,000 acres in 1923-24, as against 15,692,000 acres in the preceding year, or an increase of 2,722,000 acres or 17 per cent. The actual increase or decrease under the several kinds of fibres is shown in the

	1923-24 Acres (1,000)	1922-23 Acres (1,000)	Increase (+) or Decrease (-) Acres (1,000)
Cotton	15,382	13,588	+ 1,794
Jute	2,329	1,446	+ 883
Other fibres	703	658	+ 45

marginal table. The area under cotton showed an increase of 13 per cent. Of the total cotton area, 32 per cent was in the Central Provinces and Berar, an equal percentage in Bombay, 17 per cent in the Madras

Presidency, 11 per cent in the Punjab, and 4 per cent in the United Provinces. The area under jute showed an increase of 61 per cent. Of the total jute area 85 per cent was in Bengal and the remaining 15 per cent in the adjoining provinces of Bihar and Orissa and Assam. Other fibres also showed an increase of 7 per cent as compared with the preceding year.

Dyes and Tanning
materials

The total area under dyes and tanning materials was 700,000 acres in 1923-24. Of this, the area under indigo was 175,000 acres, showing a decrease of 102,000 acres or 37 per cent. Of the total indigo area, 51 per cent was in the Madras Presidency, 21 per cent in the Punjab, 14 per cent in Bihar and Orissa, and 12 per cent in the United Provinces. Other dyes and tanning materials covered an aggregate area of 525,000 acres.

Drugs and narcotics

Drugs and narcotics occupied 2,218,000 acres in 1923-24, as against

	1923-24 Acres (1,000)	1922-23 Acres (1,000)	Increase (+) or Decrease (-) Acres (1,000)
Opium	142	147	-5
Coffee	96	97	-1
Tea	718	710	+3
Tobacco	1,026	1,033	-7
Other drugs and narcotics	241	241	-

2,228,000 acres in the preceding year, or a decrease of 10,000 acres. The actual increase or decrease under each kind of drugs and narcotics is stated in the marginal table.

Fodder crops

The head "fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, lucerne, fodder jowar, and carob or locust tree. The total area under fodder crops in 1923-24 was 8,764,000 acres, as against 8,712,000 acres in the preceding year.

Fruits and vegetables
including root crops

The total area under fruits and vegetable crops in 1923-24 was 5,210,000 acres, as against 5,520,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see page 27 and Appendix D.]

Miscellaneous crops

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,187,000 acres. Of this, about 1,218,000 acres were occupied by miscellaneous food-crops and about 969,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on page 27 and Appendix D.]

Area sown more than
once

The total extent of land on which more than one crop was cultivated during the year was 31,176,000 acres, as against 33,883,000 acres in the preceding year.

The statistics recorded in Table V are based on cattle censuses. The census is taken annually in certain provinces and quinquennially in others.* The first general quinquennial census was taken in 1919-20. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. The animals are divided into three classes, namely, (1) bovine, comprising oxen and buffaloes, (2) ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys, and camels. The total number of live-stock of each of these three classes in each province,

	Number in thousands				
	Bovino	Ovino	Others	Ploughs	Carts ^a
Madras . . .	22,294	16,515	181	4,287	1,037
Bombay . . .	10,002	4,481	505	1,858	681
Bengal . . .	24,724	4,396	126	4,448	787
United Provinces . . .	20,764	6,100	764	4,872	842
Punjab . . .	15,297	8,738	1,298	2,821	814
Burma . . .	5,827	362	91	711	693
Bihar and Orissa . . .	19,853	4,140	108	8,034	104
Central Provinces and Berar . . .	11,545	1,536	153	1,401	933
Assam . . .	5,472	797	20	942	43
North-West Frontier Province . . .	1,132	634	200	213	10
Ajmer-Merwara and Manpur . . .	367	425	11	38	12
Coorg . . .	145	3	1	30	1
Delhi . . .	136	30	10	17	6
Total . . .	<u>146,498</u>	<u>48,367</u>	<u>8,566</u>	<u>23,695</u>	<u>5,808</u>

together with the numbers of ploughs and carts, is stated in the margin. Of the total number of live-stock of the bovine class (146 millions), which is cattle proper, the United Provinces accounted for 20 per cent, Bengal 17, Madras 15, Bihar and Orissa 14, the Punjab 10, the Central Provinces and Berar 8, Bombay 7, and the remaining provinces 9 per cent. In the case of stock of the ovine class (sheep and goats), however, Madras accounted for 34 per

cent of the total, followed by the Punjab (18 per cent), the United Provinces (13 per cent), Bombay, Bengal and Bihar and Orissa (9 per cent each). The table below shows the number of live-stock of the bovine class (cattle proper) per 100 acres of sown area and per 100 of the population in each province :—

	Number of cattle		Number of cattle	
	Per 100 acres of sown area	Per 100 of population	Per 100 acres of sown area	Per 100 of population
Madras . . .	69	53	Central Provinces and Berar	47
Bombay . . .	32	55	Assam . . .	93
Bengal . . .	108	54	North-West Frontier Province	47
United Provinces . . .	83	66	Ajmer-Merwara and Manpur	118
Punjab . . .	57	74	Coorg . . .	101
Burma . . .	36	44	Delhi . . .	28
Bihar and Orissa . . .	80	58		

It will be seen that the number of cattle per 100 acres of sown area ranges between 32 in Bombay and 118 in Ajmer-Merwara and Manpur, while the number per 100 of population varies from 28 in Delhi to 88 in Coorg. The average for British India, as a whole, is 66 per 100 acres of sown area and 60 per 100 of the population.

The varieties of land tenure in the different provinces are included in Table VI and are given, as far as possible, under one or other of the following three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). When the revenue is assessed by the State, permanently or temporarily, on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; and when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants, of smaller holdings, the tenure is known as *raiyatwari*. Under either system there may be rent-paying sub-tenants. Zamindari tenure may be either *permanently settled*, i.e., where the land revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a limited number of years only. Village

* In Burma, the Central Provinces and Berar, Ajmer-Merwara and Manpur Pargana the census is taken annually; in all other provinces it is taken quinquennially.

communities and raiyatwari tenures are, as a rule, temporarily settled, and the land revenue assessed on them is liable to change from time to time.

The following table shows the position in the surveyed areas of the various provinces, as regards the forms of land tenure, according to the latest statistics available, the figures roughly indicating the extent to which the different systems prevail :—

	Raiyatwari	Zamindari (individual proprietors or village communities) settled		Total (1,000)
		Permanently Acres (1,000)	Temporarily Acres (1,000)	
Madras	62,091	29,629	...	91,720
Bombay	74,946	...	3,912	78,858
Bengal	...	37,865	11,311	49,176
United Provinces	...	7,432	60,391	67,823
Punjab	56,326	56,326
Burma	155,653	155,653
Bihar and Orissa	...	41,880	11,223	53,112
Central Provinces and Berar	23,684*	...	40,431	64,115
Assam	27,559	3,931	1,678	33,168
North-West Frontier Province	8,384	8,384
Ajmer-Merwara	...	974	797	1,771
Manpur	31	31
Coorg	1,012	1,012
Delhi	368	368
Total	844,976	121,720	194,821	681,517

It will thus be seen that 52 per cent of the total area is held by *raiyatwari* proprietors, while 18 per cent is held by permanently settled and 30 per cent by temporarily settled *zamindari* proprietors.

The statistics for this table are collected annually in Burma, Assam, Ajmer-Merwara, Manpur, the Punjab, Delhi, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar and Orissa, the United Provinces, Bombay, Madras and Coorg. According to the latest statistics available, the total revenue from land

(excluding cesses) for the whole of British India amounts to Rs 38 crores. This represents the actual realisable demand † on account of the year, no account being taken either of the collection of arrears for past years, or of amounts remaining uncollected at the end of the year. The marginal table shows the total land revenue assessment, the total population, and the assessment per head of population in each province. For additional details, reference should be made to Table No. 14 on pages 34-41.

	Total revenue from land (Rs 1,000)	Total popula- tion (1,000)	Revenue per head R s.
Madras	7,28,30	42,319	1 11
Bombay	4,38,38	18,116	2 7
Bengal	2,01,58	45,783	— 10
United Provinces	6,99,58	45,376	1 9
Punjab	5,74,57	20,662	2 12
Burma	5,83,00†	13,212	4 9‡
Bihar and Orissa	1,56,60	34,002	— 7
Central Provinces and Berar	2,17,12	13,960	1 9
Assam	1,00,60	7,470	1 6
North-West Frontier Province	26,24	2,276	1 2
Ajmer-Merwara	3,54	495	— 11
Manpur	16	6	2 9

Total	37,77,26	241,334	1 9

Table VII
Harvest prices

Table VII shows prices of staple crops at harvest-time. It will be seen from this table that the average prices of winter rice, cholum or jowar, gram,

* Including Government forests.

† Sums remitted on account of unoccupied lands, short crops, etc., are wholly excluded from this total amount in the case of provinces where all remissions are granted within the year to which the return relates, but in provinces where remissions are not granted or are only partially granted within the year, no deduction is made on account of remissions.

‡ Excluding districts for which figures for revenue are not available.

sugar (raw), cotton, sesamum, and groundnut were higher than in the previous year, while those of rice (unhusked), wheat, barley, cumbu or bajra, maize, jute, linseed, rape and mustard and tobacco were lower.

The Agricultural Department in each province maintains a statement of the average yield per acre of land of average quality, irrigated and unirrigated, of crops in each district. In order to test the accuracy of the standards of normal or average yield, and, if necessary, to revise them, a system of crop-cutting experiments exists in almost all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the Provincial Agricultural Department. The results of the experiments are reported to the head of the Provincial Agricultural Department, who revises the standards in the light of these returns, local enquiries and personal knowledge. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table in Appendix A shows the provincial averages as last revised with reference to the crop-cutting experiments and enquiries made up to 1921-22. The district figures are shown in the Blue Book styled "Quinquennial Report on the Average Yield per acre of Crops in India for the period ending 1921-22."

Appendix B, as stated before, contains explanatory notes which are essential for the correct understanding of the different tables in the different provinces. Appendices C and D require little or no comment. Appendix C explains the vernacular terms used in this volume, and Appendix D the classification in Table IV of the various crops cultivated in India.

The map, charts, and diagrams exhibited in the volume illustrate—

Charts

- (1) the departure of sown area and that of rainfall in 1923-24 from the average of the preceding ten years;
- (2) variations in rainfall as compared with the normal in relation to the total area sown, food-crops area, and current fallows (reversed);
- (3) the rainfall in wheat-growing tracts (June to February) as compared with the total and unirrigated wheat areas;
- (4) total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow, and current fallows;
- (5) total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops;
- (6) area under rice, wheat, millets, oilseeds, cotton, jute, and other crops;
- (7) total area sown and area under different crops;
- (8) total live-stock divided between bovine, ovine, and others;
- (9) shares of provinces in the total area under principal crops, and
- (10) harvest prices of certain principal crops.

D. N. GHOSH,

*Director of Statistics
for Director-General.*

Calcutta, November 26, 1925.

2. Total area sown, area under food crops, current fallows (reversed) and the variations in rainfall, as compared with normal:

3. Total wheat area, unirrigated wheat area and rainfall in wheat-growing tracts (June to February).

NOTE.—(1) In the above charts figures of area represent million acres, while those for rainfall inches.
(2) The scale of the curves in Chart No. 3 for "total wheat area" and "unirrigated wheat area" has, in order to effect a better comparison, been made much larger than that used for the curve showing "rainfall."

4. Total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow and current fallows.

NOTE.— 1. "Total cultivable area" represents the sum of net area sown, culturable waste, and current fallows.
 2. "Uncultivable area" includes the area under forest.
 3. The sudden rise in the total cultivable and uncultivable area from 1921-22 is chiefly due to the addition of certain tracts in Burma from that year.

5. Total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops.

6. Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops.

NOTE.—Millets represent jowar, bajra, and ragi.

7. Total area sown in 1923-24.

Total area sown	254 million acres
Area under food crops (unshaded)	208 "
Area under non-food crops (shaded)	46 "

Note.—“Other food crops” are minor food-grains, condiments and spices and miscellaneous food crops.

“Other non-food crops” are oilseeds other than sesamum, linseed, rape and mustard; fibres other than cotton and jute; dyes; drugs and narcotics; and miscellaneous non-food crops.

8. Total livestock divided between bovine, ovine, and others in 1923-24, as compared with the year 1914-15.

1914-15

1923-24

NOTE.—“Bovine” includes bulls and bullocks, buffaloes, calves and buffalo calves.

“Ovine” includes sheep and goats.

“Others” include horses and ponies, mules, donkeys, and camels.

9. Shares of provinces in the total area (in acres) under principal crops in 1923-24.

RICE
77 MILLIONS

WHEAT
24 MILLIONS

JOWAR
21 MILLIONS

BAJRA
14 MILLIONS

SUGARCANE
3 MILLIONS

TEA
718,000 AORES

* Miscellaneous revenue.

† Excludes 5,672,004 acres in the districts of Burdwan, Bankura, Murshidabad, Dinejpur, Rangpur, and Pabna, for which details are not available.

‡ Excluding certain districts for which figures for revenue are not available.

(a) Figures not available.

Column 5.—Where the land revenue includes the Zamindar's share, the net demand is entered, and the table states the payment wholly realised during the year or not, is entered after excluding arrears for past years. Sums remitted on account of unoccupied lands, short provinces where remissions are not granted or are partially granted within the year, no deduction is made on account of remissions. This column revenue from canals in Sind, fluctuating collections (including mazarrana), over-collections (Bombay), surplus collections, collections from Government summary settlement cess; (6) moturpana (house tax) collections; (6) assessment of alienated lands less quit rents; (7) recoveries on account of on collections from Government estates (Beogal); and (11) miscellaneous, comprising receipts on account of Land Registration Fees, receipts (Sind), malikana or allowances to excluded proprietors, fines and forfeitures of Revenue Courts (except in Bengal and Assam), receipts under mines (Burma), recoveries in India of law charges in England on account of appeals from India, miscellaneous receipts, rents of railway class C

Column 6.—The population is that of the last general census.

* Miscellaneous revenue.

† Excludes R17,61,554 in Dinajpur and Darjeeling for which details are not available.

‡ Excluding certain districts for which figures for revenue are not available.

(a) Figures not available.

due by the Zamindars to Government, not those due by ryuits to the Zamindars. The actual realisable demand on account of the year whether crops, etc., are excluded in the case of these provinces where all remissions are granted within the year to which the return relates, but it includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue, comprising fixed collections, rent estates, kyun tax (Burma); (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of survey and settlement charge (Bengal); (5) rents, etc., of fisheries; (6) receipts for the improvement of Government estates; (10) 12 per cent from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, huccoba tax Madras Act, II of 1864, capitation tax (Burma), petroleum well revenue, judo and amber revenue, Thathameda tax (Burma), receipts from ruby land, and rents of buildings situated on such lands.

Column 8.—As in column 5, but only ordinary land revenue on fully assessed areas is entered.

(a) Including the territory of Alsace Lorraine.

(b) Sefi crop only.

(c) Maize and Sorghum.

* Including figures for Indian States, namely, 8,587,000 acres for rice, 6,009,000 acres for wheat, 1,231,000 acres for barley, 2,068,000 acres for maize, 6,712,000 acres for cotton, and 651,000 acres for linseed. The figures for rice, barley, maize and linseed for Indian States are, however, not complete, as returns for those crops are not furnished by a number of States.

Note.—The figures for foreign countries have been taken from the International Yearbook of Agricultural Statistics, 1924-25, published by the International Institute of Agriculture, Rome.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding Departments in the Southern Presidencies. The provincial areas in this column exclude Indian States in direct political relations with the Government of India, but include States politically controlled by Local Governments, with the exception of the Tribal areas in the North-West Frontier Province.

Column 3.—In this column is entered the area of Indian States included in column 2.

Column 4.—Prior to 1908-09 this column showed the entire area (exclusive of Indian States) for which the statistics required for Tables II, III and IV were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics, for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" mean "the papers prepared by the village accountants." The village papers do not in several provinces relate to the whole area included in column 5; for instance, the village returns sometimes do not include the forest area. There are also tracts in many provinces for which no village papers exist and for which estimates have to be made to complete the statistics. In all such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts, which are calculated from village papers, are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of Table II.

(a) Differences due to revised figures being reported by the Survey Department.

(b) Differences due to the partition of the Ruby Mines district in 1920-21, a portion of which was transferred to the Shan States, and the whole area was treated as Indian States in that year.

(c) Include for the first time Hkamti Long, Putao, Southern Shan States and Karenui.

(d) Areas which were shown in this column in previous years have been treated as British districts from 1921-22.

(e) Variation due to administrative changes whereby certain States which were formerly under local Government have been placed under direct political relationship with the Government of India.

NOTE.—For detailed information, see notes in Appendix B.

Table I—*continued*

Column 2.—"Forests" mean "any land classed or administered as forest under any legal enactment dealing with forests. Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons the chief amongst which are these: (1) because the Forest Administration Reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain village lands worked and returned as forests by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the sown area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

NOTE.—(1) The variations in the areas shown in different years under the same item in the same province do not necessarily represent an actual increase or decrease on the area in question. In many cases, a revised classification or the correction of a faulty estimate is responsible for the change.

(2) For detailed information, see notes in Appendix B.

(a) Increase due to insufficiency of rainfall in several districts.

(b) See footnotes (c) and (d) on page 14.

See explanations given in the footnotes (page 16).

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the Forest Administration Report represent the areas of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

(b) Includes uncultivable Government waste and uncultivable lands.

(c) States the estimated area of culturable Government waste.

(d) Shows (1) the estimated area of culturable bands, and (2) the difference between the net area sown and the gross area of the actual holdings (exclusive of bands). It thus includes the uncultivable lands within the actual holdings, the area of which cannot be ascertained.

(e) Difference due to revision (see footnote (a) on page 16).

Columns 8 to 19 state the gross area of irrigated crops, areas sown more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7) is thus due to the inclusion in column 19 of the area irrigated at both harvests.

* Includes 35,900 acres in Naini Tal, Almora, and Garhwal for which details are not available.

Note.—(i) This table shows the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops : in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each and the areas so estimated are separately returned. The estimate is made by the village accountant or is subsequently determined on formulae prescribed by the provincial authorities.

(ii) The variations in the areas shown in different years under the same crop in the same tract do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

(iii) For detailed information, see notes in Appendix B.

Column 10 ('other food-grains including pulses').—Ahar (pigeon pea), barbati, iobia or chowli (asparagus), mung (green gram), knuthi (horse gram), urad (black gram), field gram, oheik (job's tear), lentils, chenna (common millet), kangni (Italian millet), kudo or varagu, kutki (little millet), kuhndi, peas, pigeon or bottle grass, swank or stama, chickling vetch, buck wheat, wadlu or barti.

IN EACH PROVINCE IN BRITISH INDIA.

Column 30 (other dyes and tanning materials).—Arnatto, chayroot, divi-divi, henna, madder, morinda, safflower, saffron.

Column 33.—In certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on Indian Tea Statistics published separately. The principal reason is that the special report is prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are in many cases inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

Column 37 (other drugs and narcotics).—Aloes, areca nut, sweet basil, betel-vine, country borage, bogoda brinjal or nela mulaka, datura, purple flea-bane, isfagul, klinji or vespahl, senna, soap nut, sweet flag.

(a) An annual census is taken on the 15th March in Manipur.

(b) Statistics based on a census taken in 1913-14. Figures for columns 8, 17 and 18 were revised in 1914-15.

(c) Included under "Young stock (calves)".

(d) In Coorg a census is taken every five years. The last Census was taken in March 1920 by the circle shanbaghs and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation, 1899. Animals in Municipal Towns are included.

(e) Figures for Berar under this head are included under "Bullocks".

(f) Includes uncastrated bullocks for Ajmer-Merwara.

	1922-23	(f) 3,47,562
	<i>Total</i>						
	1917-18	50,454,866	5,766,470	3,076,231	41,612,156	(a) 24,911,167	2,93,55,696
	1922-23	49,175,615	4,978,496	1,189,029	49,008,996	(r) 24,910,234	2,01,57,672

Note.—(1) The varieties of tenure are included as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). Areas under forests are included under the prevailing tenure of the province. In the Central Provinces and Bihar, however, areas under Government forests are shown separately.

(2) For detailed information, see notes in Appendix B.

Column 3.—Areas held revenue-free or at privileged rates are deducted, but the deduction need not be made where such areas are in any case less than an entire village and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In Madras, Bombay, and Bihar all land on which a full assessment has not been leviable during the year (for instance, unoccupied land) is classed for the purposes of this column as "area not fully assessed." Area should not be entered under this head merely because the assessment due from them has been suspended or remitted on account of short crops or for other special reasons.

Column 4.—This head is sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net sown area as shown in column 6 of Table II.

(3) The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

* No details

(a) Includes 3,407,181 acres in Dinhapur, Rangpur, and Pabna, for which details are not available.

(b) Returns were not available for certain areas in 1915-16. In 1920-21 they were available and hence the increase.

(c) Variation due to transfer from column 3(b) to column 3(a) of areas for which returns were formerly not available, but for which information has since been supplied.

(d) Difference due to increase of fallow lands in consequence of unfavourable rain.

(e) Includes 5,672,004 acres in Bardwan, Bankura, Murshidabad, Dinhapur, Rangpur, and Pabna, for which details are not available.

(f) Decrease due to non-receipt of Survey and Settlement cost of major operations.

POPULATION OF EACH PROVINCE IN BRITISH INDIA

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table gives the payments due by the zamindars to Government, and not those due by peasants to the zamindars. The actual total of all demand on account of the year entered after excluding arrears for past years. This column is identical with the column of "Land Revenue" in the Civil Accounts. The headman's list contains entries comprising fixed collections, revenue from canals in Sirs, fluctuating collections, including arrears, over a "quarter" (B.M.Y.), surplus collections, e. g. from 6 revenue courts, 1 year tax (B.M.Y.); 12 rate of Government excesses; 3/4th proceeds from land, including redemption of land tax; 1/4 redemption of zamindary entitlement over 500 acres per 1000 acres (excluding 1/2 rate tax on all lands); 1/4 collection of allotted lands, including quit rents; 1/2 receipt over account of survey and settlement charges (B.M.Y.); 1/2 rents, etc., of Government; 1/2 receipts for the improvement of Ghat roads and embankments; 1/10 1/2 per cent on collections from Government excesses (B.M.Y.); 1/2 collection from Peasants, including receipts on account of land registration, fees, weights, from quarries and minor mineral products, in former, but not under the jurisdiction of Sirs; 1/2 the Peasants' Peasant, water mill rents, 1/2 rent to tax (B.M.Y.); 1/2 collection of all rents, including property in Sirs, and freehold and leasehold properties (B.M.Y.). Arrears of taxes under Madras Act II of 1864, consisting of tax (B.M.Y.), with 1/2 rent, 1/2 water mill rents, 1/2 collection of all rents, including property in Sirs, and 1/2 tax (B.M.Y.) in Madras, are not included in this column. The column also includes the internal receipts from other sources (B.M.Y.), including 1/2 of all charges in Madras, and 1/2 of all receipts from India, or in India, except the internal receipts from Madras. The column also includes 1/2 of all debts of buildings situated in each State.

Comment.—The population is that of Robert's original census.

Peter S - (in stage 6, 1st cycle ordinary local averages, fully averaged over 10 cycles).

Hippocampus 9.—Tr. 1' 6" long, divided by cleft at
each end; each lobe 1' 2" long, 1' 1" wide, pointed at
each end.

Entry 10 - Tolchester & visited by entry 4 it is
now closed.

APPENDICES

APPENDIX A

The Average Yield per Acre of Principal Crops in India.

A provisional return of the yield per acre of principal crops cultivated in India was first compiled in 1892 from various statistical publications available at the time, such as agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc. To provide for the periodical revision of the estimates, a system of experimental crop cuttings was prescribed in 1893 by the Government of India, the results of which are reported by Local Governments and Administrations at the close of each quinquennium. The returns for the last quinquennium ending 1921-22 have been received and scrutinised, and tabulated in the appended tables.* These outturns per acre are of extreme importance since these will generally be used during the present quinquennium (ending 1926-27) in estimating the production of crops for which forecasts are prepared.

2. The estimate given is the average outturn on average soil in a year of average character, as deduced from the information obtained from experiments made up to the period under review. When, therefore, this average is multiplied by the average area sown, it should give as near an approximation as possible to the outturn of the crop in an average year. The Departments of Agriculture or Land Records of each province maintain standard estimates of the average yield of land of average quality (usually under the two major heads of irrigated and unirrigated land) for several crops in each district. The object of the experiments or investigations annually made is to test the accuracy of these estimates and to enable the head of the Department in each province to revise his provincial estimates, when necessary. Should it happen that the period has been one of exceptionally favourable or unfavourable conditions which have affected the experiments reported, this would not necessarily involve a change in the standard estimates for the district or for the province, unless there were other reasons for believing that, as estimates of average yield in an average year, they have been pitched too high or too low.

3. On an examination of the returns for the quinquennium ending 1911-12, it was recognised that the results of the experiments as conducted by the district revenue staff were generally unreliable. A change in the system was therefore considered necessary; and in 1915 the Government of India, with a view to improve the returns, issued instructions to employ as far as possible the expert officers of the provincial Agricultural Department for carrying out experiments on a well-ordered plan in each agricultural tract and for the investigation of average crop outturns in the various provinces. The new system was introduced in the quinquennium ending 1916-17 in some of the provinces mainly as an experimental measure, as explained in the previous report. It appears from the present reports that during the quinquennium under review the new system was not fully carried into effect in most of the provinces. In Bengal, for instance, only cuttings of jute were made by trained officers of the Agricultural Department under expert supervision. In Madras the experiments conducted by the Agricultural Department are too few to admit of the results being accepted as representative. In Bombay the new system of experiments conducted by officers of the Agricultural Department continued, but in certain districts, where the kind and value of the land varies widely from field to field, the old method had to be adopted. In Bihar and Orissa crop tests were carried out by the Agricultural Department on a small scale in thirteen districts. In the Central Provinces and Berar the experiments made are stated to be still of doubtful value. In the Punjab officers of the Agricultural Department were only consulted in revising the standards. In Burma, according to the revised instructions, the work was entrusted to the Agricultural Department from the beginning of the quinquennium under review; but as a result of the recommendations of a conference held in 1920 (which were accepted by the Local Government) the work was transferred to the Settlement Officers, on the ground that the cuttings made by them supply sufficiently reliable data for ascertaining the actual average outturns of crops. In the North-West Frontier Province, the work was entrusted to the Agricultural Department

* For district figures, reference should be made to the separate Blue Book styled "Quinquennial report on the Average Yield per acre of principal crops in India for the period ending 1921-22."

APPENDIX A—*contd.*

in the quinquennium under review; but the system, it is stated, has not proved satisfactory on account of inadequate staff. In Mysore results of crop experiments conducted by the Agricultural Department were utilised for checking and revising those of the Revenue Department.

4. As a result of the experiments conducted or investigations made during the quinquennium under review, considerable changes have been made in the averages previously adopted, except in the United Provinces, Bombay, and the Central Provinces and Berar. In Bengal, the yield of autumn rice has been raised from 871 to 888 lbs, of jute from 1,300 to 1,330 lbs, and of sugarcane from 2,963 to 3,004 lbs. In Madras, the average outturn of sugarcane has been raised from 5,040 to 6,420 lbs, of rice from 1,047 to 1,065 lbs, and of cotton from 66 to 78 lbs. In Sind rice has been raised from 1,316 to 1,341 lbs and cotton from 170 to 190 lbs. In the Punjab, the yield of wheat has been raised from 791 to 856 lbs, of gram from 615 to 671 lbs, and of sugarcane from 1,933 to 2,191 lbs. In Assam, the yield of jute has been increased from 1,320 to 1,400 lbs and of sugarcane from 2,016 to 2,128 lbs. In the North-West Frontier Province, the yield of sugarcane has been raised from 2,660 to 2,721 lbs. On the other hand, the standards have been lowered in certain cases. The yield of winter rice has been decreased from 1,036 to 1,029 lbs in Bengal, from 1,284 to 987 lbs in Bihar and Orissa, and from 952 to 896 lbs in Assam. Autumn rice in Bihar and Orissa has been lowered from 800 to 741 lbs. In Madras jowar has been reduced from 696 to 569 lbs, bajra from 624 to 488 lbs, and ragi from 1,092 to 927 lbs. In the Punjab maize has been lowered from 1,040 to 962 lbs and jowar from 470 to 434 lbs. Wheat, barley and bajra in the North-West Frontier Province have been put at lower figures, viz. 614 lbs, 880 lbs, and 436 lbs, as against 676 lbs, 907 lbs, and 552 lbs, respectively, in the preceding quinquennium.

5. The statement below compares the average outturns of the major crops in the different provinces. The relative importance of each province in respect of each crop has also been shown by percentages representing the proportion of the total area under each crop in British India cultivated in each province. Tea has been included in this statement, although this crop is not dealt with in the quinquennial returns, the average outturns having been calculated from the special tea returns for the five calendar years ending 1921.

NOTE.—(1) For district figures, reference should be made to the separate Blue Book styled "Quinquennial report on the Average Yield per acre of principal crops in India for the period ending 1921-22."

(2) Average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, and the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.

(3) The superseded figures of the previous quinquennium have been inserted merely to show the trend of the revision made in each period.

* The variations in the figures of yield of crops now reported as compared with previous ones are due to the fact that the averages have been worked out not approximately as before, but accurately.

† The averages for Burma for 1916-17 are based on the normal outturns per acre given in the Season and Crop Report of Burma for 1916-17.

APPENDIX B.

EXPLANATORY NOTES.

Table I.—Area.

Madras
(Page 14)

Column 2 states the area as ascertained by the provincial Survey Department, supplemented, for tracts which have not come under the operations of that Department, by areas obtained with the computing scale from the Survey of India Atlas sheets of the localities concerned.

Columns 5 and 6.—The statistics for the major portion of the zamindari estates and certain raiyatwari and whole inam villages are based on estimates, owing to the absence of adequate agency for the collection of statistics in these tracts. Of the total area (90,351,958 acres) entered in column 6 for 1923-24 (page 14), 68,260,015 acres are based on actual returns and 22,082,943 acres on estimates.

The total area in column 5 includes the unaccounted-for difference in the Ramnagar district between the Atlas sheet scale and traverse area on the one hand, and the estimated areas in the village accounts of unsurveyed areas on the other. The difference in 1922-23 and 1923-24 was about 952,000 acres. The matter is under correspondence with the Collector.

Bombay
(Page 14)

Column 2 states the area as returned by the provincial Revenue Survey and Settlement Department, supplemented in the case of Indian States by the return of the Topographical Survey. In Sind, the revenue survey being incomplete the exact area is not known: the column states the area of surveyed tracts *plus* the estimated area of unsurveyed tracts.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the Revenue Survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (78,869,984 acres) entered in columns 5 and 6 for 1923-24 (page 14), 74,724,431 acres are based on actual returns and 4,145,553 acres on estimates.

Bengal
(Page 14)

The area cadastrally surveyed up to 1923-24 comprises 31,477,691 acres or about 65.77 per cent of the total area of the province (exclusive of Indian States and the Chittagong Hill Tracts). The figures for the remaining area of the province are based more or less on estimates.

United Provinces
(Page 14)

Columns 5 and 6.—For tracts which possess no agency for collecting statistics, the figures are based on estimates. Of the total area (68,106,425 acres) entered in column 6 for 1923-24 for the provinces, 60,715,425 acres are based on actual returns and 7,391,000 acres on estimates.

Punjab
(Page 14)

Column 6.—Figures for area in river beds in Gurgaon not accounted for in the revenue papers and for high mountainous tracts in Simla and Kangra are based more or less on estimates. (See also notes to column 3 in Table II, page 56.)

Burma
(Page 14)

Columns 2, 5 and 6.—In districts where there has been no professional survey, estimates framed in the best manner possible are accepted subject to revision from time to time as survey extends.

Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myitkyina and Kathu districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08. Feudatory States in Upper Chindwin and Yamethin and the Northern Shan States, which were formerly included in columns 2 and 3 and excluded from columns 5 and 6, are shown, from 1921-22, in columns 2, 5 and 6 and excluded from column 3. Putao, the Southern Shan States and Karenui have been included from 1921-22.

APPENDIX B—*continued.*EXPLANATORY NOTES—*continued.*Table I.—Area—*continued.*

Of the total area (155,652,667 acres) for the whole province, 32,105,195 acres are based *Burma—contd.* (Page 14) on actual survey and the balance (123,547,472 acres) on estimates.

The area cadastrally surveyed is 50,588,197 acres, which is 95·25 percent of the total area *Bihar and Orissa* (Page 15) of the province (exclusive of Indian States). The figures for the remaining area of the province are based more or less on estimates.

Columns 2, 5 and 6.—For the unsurveyed areas of zamindari estates and waste land grants *Central Provinces and Berar* (Page 15) for which accurate statistics are not available, the figures are based on estimates. In the Central Provinces the zamindars are chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been restricted to the rank of ordinary subjects. For Berar column 2 states the area as ascertained by the local Survey and Settlement Department.

The figures have been very carefully extracted from the most recent existing maps by *Assam* (Page 15) the Director of Survey, Assam, and may be taken as approximately accurate to within something under 5 per cent.

Column 2 states the area as given in the settlement records. The area for the *Manpur and Ajmer-Merwara* (Page 15) Pargana excludes *jagir* and *inam* villages.

Table II.—Classification of Area.

Column 2 includes the area cultivated within forests. The area cultivated with coffee, Madras (Page 16) tea and rubber within forests is, however, excluded from this column and is shown under column 6, since the year 1818-19.

Column 4 includes areas occupied by *babul* and casuarina trees when they do not form parts of forest areas.

Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 6.—Of the total net sown area for 1923-24 (32,281,647 acres) stated in this column, 27,210,446 acres are based on actual returns and 5,065,201 acres on estimates.

Figures for unsurveyed villages are based on estimates.

Column 2, so far as Bombay proper is concerned, includes land administered by the Forest *Bombay* (Page 16) Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions. The figures in Sind also do not agree with those in the Forest Administration Report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision of survey, which the revenue records do.

Column 3 includes all land recorded at the Survey and Settlement as unculturable, though at times a very small quantity of this land is cultivated.

APPENDIX B—*continued.*EXPLANATORY NOTES—*continued.*Table II.—Classification of Area—*continued.*

Bombay—*contd.*
(Page 16)

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 6.—Of the total net sown area (26,910,647 acres) in Bombay proper entered in this column for 1923-24, 25,678,511 acres are based on actual returns and 1,232,136 acres on estimates.

Bengal
(Page 16)

Column 2.—The figures represent Government forests and estimates of other forest areas furnished by district officers.

United Provinces
(Page 16)

Column 2 includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the Forest Administration Report which excludes these areas. This column also includes the Siwalik Range in the Dehra Dun district.

Column 5.—The maximum period for which land left untilled is reckoned as fallow is three years.

Column 6.—Of the total net sown area (35,640,158 acres) entered in this column for 1923-24 for the provinces, 35,045,188 acres are based on actual returns and 604,000 acres on estimates.

Punjab
(Page 16)

Column 2 includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

Column 3.—This column includes 28,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, and 3,896,960 acres of mountain tracts in Kangra. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually.

Burma
(Page 16)

For tracts outside the surveyed area the figures are based on estimates.

Column 2.—The area classed as forests comprises only those areas which are administered by the Forest Department as reserved forests or fuel reserves.

Column 3.—Land not available for cultivation includes all land absolutely barren and all lands covered by buildings, roads, water or otherwise appropriated to uses other than agriculture. In settled tracts the unculturable area is taken from settlement registers, but in the unsettled tracts it is obtained from the best source available.

Column 4 includes land thrown out of cultivation and abandoned and any land under palms and bamboos and thatching grass which is not shown in column 2, 3, 5 or 6.

Column 5 includes all land occupied for agricultural purposes which is left uncultivated. In Lower Burma (excluding the Thayetmyo district) such lands are assessed at privileged rates, but in Upper Burma and in Thayetmyo no assessment is levied on land left uncultivated.

Column 6.—Of the total net area sown (16,258,641 acres) entered in this column for 1923-24 for the whole province, 14,512,551 acres are based on actual returns and 1,741,090 acres on estimates.

APPENDIX B—*continued.*

EXPLANATORY NOTES—*continued.*

Table II.—Classification of Area—*continued.*

Column 2.—The figures represent Government forests and estimates of other forest areas Bihar and Orissa furnished by district officers. (Page 17)

Column 2 shows the areas administered by the Forest Department; but the figures Central Provinces differ from those in the Forest Administration Report, because the actual area of the forest ^{and Berar} (Page 17) is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thikadari villages surveyed, clearance leased villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur and Bilaspur districts, this column also includes all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation. In Berar, the forest area includes those administered by the Forest Department, but excludes a large area of cultivated land in the Melghat taluk in Amraoti shown as forest in the forest report.

Column 3 states areas covered with water, hill or rock, and land occupied by buildings and roads. For Berar, it includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes uncultivable portions of culturable fields.

Column 4 states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings. For Berar, it includes land available for cultivation but not given out.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow. For Berar, it includes occupied culturable land left fallow for private reasons such as grazing, rotation, etc.

Column 2.—The figures represent reserved forests, but exclude the areas of forest villages Assam within the reserves which are entered under the appropriate heads of this table. (Page 17)

Columns 3 and 4.—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good.

Column 5 includes generally all lands which are thrown out of cultivation or not cultivated for three years, but which remain in the occupation of leaseholders. Figures for the hill districts (except the plains portion of the Garo Hills) and Sadiya Frontier Tract, are rough estimates.

Column 6.—The figures are obtained from the abstract crop statement for districts which have been cadastrally surveyed. The figures for the permanently settled estates of Sylhet and Goalpara and for the hill districts and the Sadiya Frontier Tract are based on estimates. The figure for the Balipara Frontier Tract represents the area under tea only.

Column 2 includes all lands specially allotted to forest growth under the control of North-West Frontier Government or any Local Board or Municipality, and protected village waste in Hazara Province (Page 17) administered by the district officer and other waste lands in Peshawar.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dora Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

APPENDIX B—continued.

EXPLANATORY NOTES—continued.

Table II.—Classification of Area—concluded.

Ajmer-Merwara and
Manpur Pargana
(Page 17)

Column 2.—The forest area in Ajmer-Merwara relates to khalsa, jagir and minor istamrar villages, but excludes village lands managed by the Forest Department, which do not technically constitute Government forests.

Madras
(Pages 18-19)

Column 4.—The term “tanks” refers to a particular kind of dammed reservoirs. These reservoirs are formed by enclosing depressions or throwing dams across the valleys of small rivulets and streams to intercept water during the rains.

Column 7.—Of the total area (9,000,422 acres) irrigated in 1923-24, 7,497,886 acres are based on actual returns and 1,502,536 acres on estimates.

Bengal
(Pages 18-19)

Columns 2 to 19.—Areas irrigated from all sources are only estimates, except in the case of areas irrigated from Government canals.

United Provinces
(Pages 18-19)

Columns 2 to 6.—Government canals include private canals except in Dehia Dun, Naini Tal, Budaun, and Basti for which districts separate figures for private canals are obtained. There are very few private canals in the United Provinces.

Column 7.—Of the total area (7,982,158 acres) irrigated in 1923-24, 7,946,258 acres are based on actual returns and 35,900 acres on estimates.

Punjab
(Pages 18-19)

Columns 8 to 19 state the gross area irrigated, that is, land irrigated in both seasons is counted twice.

Burma
(Pages 18-19)

Columns 8 to 19 include only crops actually irrigated; for instance, where an unirrigated crop of sesamum is taken off land which is afterwards irrigated and planted with paddy, the area grown with sesamum is not included in this column.

Bihar and Orissa
(Pages 18-19)

Columns 2 to 19.—The figures are only estimates, except in the case of areas irrigated from Government canals.

Assam
(Pages 20-21)

Columns 2 to 19.—Estimates of areas irrigated are available for Sylhet, Kamrup, Darrang, Sibsagar, the Khasi and Jaintia Hills, the Naga Hills, the Garo Hills, the Lushai Hills and the Sadiya Frontier Tract. In the case of the last five districts, however, the estimates are somewhat incomplete.

North-West Frontier
Province
(Pages 20-21)

Columns 8 to 19 state the gross area irrigated, that is, land irrigated in both seasons is counted twice, but areas irrigated more than once in a single harvest are included only once in columns 2—7.

Table IV.—Area under Crops.

Madras

(Pages 22-23, 26-27)

Column 39 (fodder crops) states the areas sown with grass and crops solely for fodder. Lands left waste for grazing and on which grass grows spontaneously are not included in this column. It shows crops that in normal times are used only as fodder.

APPENDIX B—continued.**EXPLANATORY NOTES—continued.****Table IV.—Area under Crops—continued.**

Figures for unsurveyed villages are based on estimates.

Bombay
(Pages 22-23, 26-27)

Statistics are not prepared by village or circle officers. The figures entered in this table Bengal (Pages 22-23, 26-27) are estimates. Statistics for jute only are collected through the agency of *panchayats* (village unions).

The area sown with unimportant mixed crops, for which no separate heading is provided United Provinces (Pages 22-23, 26-27) in the provincial crop statements, is assigned to the principal crop by the village accountants. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jowar and arahar, bajra and arahar, and cotton and arahar, for which separate headings are provided in the crop statements, are distributed in accordance with prescribed formulae and entered under the crops of which they are composed.

Columns 3, 4, 5, 6, 9 and 10.—The whole of the area of the land planted with food grains wheat, barley, etc., mixed with oilseeds, is shown under food-grains in this table. The area sown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 4,160,000 acres in the whole of the United Provinces of Agra and Oudh in 1923-24.

Columns 12, 13 and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1923-24 for the whole of the United Provinces of Agra and Oudh to 690,000 acres of linseed, 920,000 acres of sesamum, and 2,550,000 acres of rapeseed.

There is no agency for the collection of statistics in Almora, Garhwal, and the hill tracts of Naini Tal. Estimates have, however, been made for Garhwal and included in the table.

For tracts outside the surveyed area the figures are based on estimates framed in the Burma (Pages 22-23, 26-27) best manner possible.

No statistics are at present prepared by village or circle officers, except in the Sambalpur Bihar and Orissa (Pages 22-23, 26-27) district. The figures for all other districts entered in this table are estimates. The estimates for Patna, Gaya, Shahabad, Saran, Champaran, Munzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, Puri, Cuttack (exclusive of small permanently-settled areas), Balasore, Angul, the Santhal Parganas, Hazaribagh, Ranchi, Palamau and Singhbhum are, however, based on the figures collected during the cadastral survey.

The areas of crops except cotton and tea are collected by the Land Records Staff for the Assam (Pages 24-25, 28-29) temporarily settled plains districts and plains portion of Garo Hills, and those for the Hills are based on estimates revised quinquennially by the District Officers except in case of forecast crops for which estimates have to be made annually. In the permanently settled tracts of Sylhet and Goalpara the areas of Jute are reported by the village Chaukidari Pauchiyats. For other crops except cotton and tea the areas are estimated in Sylhet by the Deputy Commissioner on the basis of the population figures and the surveyed areas of the temporarily settled parts of the district, and in Goalpara they are obtained from Zamindars. Tea statistics in all districts are supplied by the tea-garden Managers and Proprietors. The areas of cotton are obtained in Cachar from Patwaris for the plains subdivisions and for the North Cachar Hills estimate is made by the Sub-Divisional Officer; in Sylhet information is obtained from the Collector of *daor-tax*, in the Garo Hills from hill Mauzadars, in Nowgong from the Supervisor Kannango of hill Sub-Circle, in Sibsagar and Goalpara from Mandals or other village officers, in Khasi and Jaintia Hills from Dolois and Sirdars, and in the Naga and Lushai Hills from intelligent chiefs.

Column 40.—The area under fruits and vegetables includes village sites.

APPENDIX B—continued.**EXPLANATORY NOTES—continued.****Table V.—Live-stock.**

Madras
(Pages 30-31)

The last quinquennial census was taken in October, 1919, in all villages, Government zam, and Zamindari, and stock in cities, cantonments, and that employed in Government Departments and Municipalities were included. Oxen, buffaloes, horses and ponies not old enough for work or breeding were treated as young stock.

Bombay
(Pages 30-31)

The figures are collected once in five years. The last quinquennial census was taken in 1919-20.

Bengal
(Pages 30-31)

Figures for 1912-13 are based on a cattle census taken in 1912; the figures for most of the districts in columns 2 to 4 have, however, subsequently been revised. The census did not take into account the animals named in columns 9 to 16, nor ploughs and carts (columns 17 and 18). Figures for 1919-20 under all the heads are based on a cattle census taken in 1920.

United Provinces
(Pages 30-31)

The table is prepared quinquennially on a census in each district taken every five years. The census which was due in 1913-14 but could not be taken in that year, owing to famine in some of the districts, was taken in 1914-15 in all the districts except Almora, Garhwal, and the hill tracts of Naini Tal. In these latter districts the census was taken in 1912. The last census was taken in 1920, except in Almora, Garhwal, and the hill tracts of Naini Tal.

Punjab
(Pages 30-31)

A census for the whole province is taken every fifth year in the first week of February. The last census was taken in 1923. All cattle in cantonments and Municipalities as also those belonging to Government are included.

Burma
(Pages 30-31)

Annual returns of agricultural stock are prepared by village headmen, revenue surveyors, and *taikthugyi*, the enumeration taking place from end of February to middle of March in each year. The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

Bihar and Orissa
(Pages 30-31)

The figures for 1913-14 shown in the table for all the districts of the province, except Hazaribagh, Ranchi, Palamau, and Manbhum, were arrived at by a census of live-stock held in these districts towards the end of 1913. For Palamau, Hazaribagh, and Ranchi the figures were based on information collected during survey operations, while the figures for Manbhum were based on police reports. Corrections were made in the figures for Hazaribagh in 1915-16 and for Palamau in 1917-18. The figures for 1919-20 were for the most part ascertained by a census held in January 1920. In Manbhum the available settlement figures were supplemented by a census. In Hazaribagh and Ranchi, the previous settlement figures were brought up to date by a census in one per cent of the villages. In Palamau the settlement figures were accepted. The 1919-20 figures were finally corrected in 1922 when a review of the census was published.

**Central Provinces
and Berar**
(Pages 32-33)

The figures are collected annually, between the 1st January and the 15th March, by the patwaris in each village for the areas in their respective charges. The total figure is recorded in the tahsil by the kanungo in a village register. The patwari takes into account all animals including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in cities, large towns, cantonments, and in forest villages are included. In Berar, a census is made annually by the village officers. All cattle belonging to one owner are entered against his name even though the animals are

APPENDIX B—*continued.*EXPLANATORY NOTES—*continued.*Table V.—Live-stock—*continued.*

temporarily absent from the village.' When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

The statistics for 1919-20 are based on a cattle census held in 1920 except in the plains ^{Assam} (Pages 32-33) portion of Garo Hills for which the figures are those obtained at a census taken in 1918. No information is available for Garo Hills (hill portions), Naga Hills, Khasi and Jaintia Hills Lushai Hills, and the Baiipara Frontier tract.

A census for the whole province is taken every fifth year in the first week of February. North-West Frontier Province (Pages 32-33)
The last census was taken in 1920. All cattle belonging to Government are included.

Table VI.—Land Revenue.

The table is prepared quinquennially. The figures were last collected in 1923-24.

^{Madras} (Pages 34-35)

Column 3 (a).—In the case of raiyatwari tracts this column states the areas of unoccupied assessed lands, of all unassessed porambokes, of minor inam lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous"; and in the case of zamindari tracts the areas of hills, porambokes, and minor inams are entered. The entire area of whole inam villages is deducted from this column.

Column 3 (b).—Raiyatwari includes the area of certain Agency tracts in Ganjam, Vizagapatam, and Godavari, and also the difference between the area by professional survey and the area according to village papers.

Column 4 (a).—The figures for the raiyatwari tenures in this column represent the total occupied area stated in village papers which differ in some cases from the resultant of preceding columns.

Column 4 (b).—For certain districts areas actually cultivated and for certain others estimates, or actuals supplemented by estimates, are shown in this column.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Column 8 shows only the "ordinary revenue", as defined in the Civil Accounts, on area fully assessed.

Column 10.—The cultivated area is, in the case of raiyatwari and zamindari lands, the not cropped area out of the area given in column 4 (a).

Column 11 states the entire population of raiyatwari and zamindari villages, respectively.

This return is prepared quinquennially.

^{Bombay} (Pages 34-35)

Column 1.—Lands held under special tenures, such as talukari, nichwasi, udhad-jama bandi, nervadari, and bhagdari in Gujarat and khoti and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)".

Column 3 (a) includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and also the fully assessed unoccupied area. For Sind, it includes fallows and fully assessed unoccupied area.

Column 3 (b) includes alienated cultivated and zamindari cultivated (estimated) land.

APPENDIX B—*continued.*EXPLANATORY NOTES—*continued.*Table VI.—Land Revenue—*continued.*

Bombay—*contd.*
(Pages 34-35)

Column 4 includes land under temporary cultivation, also pot inams paying full assessment. For Sind it excludes fallows and fully assessed unoccupied area [see note to column 3].

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years about 2·5 per cent of the total revenue entered in this column for Bombay Presidency was remitted on account of unassessed unoccupied lands, short crops, etc.; in Sind 6·3 per cent of the total revenue entered in this column was remitted on account of assessed unoccupied lands, short crops, etc.

Column 10.—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area. In Sind the incidence is calculated from the cultivated area (excluding fallows) and the assessment on that area.

Column 11 includes population of pot inams and the like scattered areas for the Bombay Presidency, which cannot be distinguished from the population of the fully assessed area.

Bengal
(Pages 34-35)

The table is prepared quinquennially, and the figures were last collected in 1922-23.

Column 1.—The following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)*, comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 4 (b) includes in certain cases fully assessed current fallows.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

United Provinces
(Pages 36-37)

The table is prepared quinquennially, and the figures were last collected in 1921-22.

Columns 3 (a) and 3 (b) exclude small revenue-free plots, for which details are not forthcoming.

Column 5 states (1) "ordinary revenue," comprising (a) fixed collections (including land revenue on account of resumed *Gorai Jagirs*), (b) fluctuating collection, (c) surplus collections, (d) collections from Government estates (including collections from Dudhi, Taiti, and Bhabar estates, and receipts from forest estates); (2) sale of Government estates; (3) sale-proceeds of waste lands and redemption of land tax; (4) miscellaneous, comprising (a) receipt from quarries and mineral products in forest and land not under the management of the Forest Department, (b) water mills rent, (c) malikanas or allowance to excluded proprietors, (d) fines and forfeitures of revenue courts, (e) recoveries in India of law charges in England on account of appeals from India, (f) miscellaneous receipts, namely (i) patwari miscellaneous receipts (revenue record room), (ii) mutation fees, (iii) mutation fines, (iv) sale of waste paper, and (v) partition fees, (g) rents of railway class "C" land and rents of buildings situated on such land. On the average of the last five years about 2·13 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 6.—The total population of the province includes the population of the Benares State.

Column 11 includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

Columns 13 and 14.—The figures are taken from the Census Reports of 1921.

APPENDIX B—continued.**EXPLANATORY NOTES—continued.****Table VI.—Land Revenue—continued.**

Column 2 states the total area by last settlement survey.

Columns 3 (a) and 3 (b) include villages receiving frontier remissions, tracts which are Punjab entirely unassessed (such as the Kulu Mountains) and istamrari tenures. (Pages 36-37)

Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue.

Column 10.—The cultivated area taken for calculating the incidence is exclusive of current fallows.

Column 2 includes tracts outside the surveyed area for which the figures are mostly Burma based on estimates. (Pages 36-37)

Column 3 (a).—No deduction is made for areas held revenue-free or at privileged rates as they are ordinarily less than an entire village and as it is difficult to estimate the corresponding deductions to be made in the population (column 11).

Column 3 (b) includes the whole area except that occupied for cultivation.

Column 4 (a) includes the area occupied for cultivation including land wholly or partly exempted or remitted from assessment on account of fallow or short crops.

Column 4 (b) represents the area actually sown whether assessed or exempted or remitted from assessment.

Column 5 comprises ordinary land revenue (including water rate), capitation tax thatkameda tax, fishery revenue and miscellaneous revenue (petroleum, rubies, other minerals, etc.). Sums remitted on account of uncultivated land or short crops, etc., are excluded.

Column 6 represents the population at the last census with no allowance for subsequent increase.

Column 8 represents the ordinary land revenue (including water rate) actually collected or due for collection within the year excluding remissions and exemptions.

The table is prepared quinquennially.

Column 1.—The following classification of estates has been adopted:—

Bihar and Orissa
(Pages 36-37)

(1) *Zamindari* (*permanently settled*) including estates managed for proprietors by Government;

(2) *Zamindari* (*temporarily settled*) comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods and (b) all estates owned by Government as proprietor.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 0.3 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 1.—*Zamindari* (*temporarily settled*) includes malguzari and thekadari.

Central Provinces

and Berar

(Pages 36-37, 38-39)

Column 2 states the area by village pārs (column 6 of table I, No. 9).

Column 3 (a).—*Zamindari* estates properly so-called (that is, excluding malguzari) are classed as not fully assessed in the Central Provinces. In Berar, this column states jagir, izara, and palampat villages, all unassessed lands, forest areas, village sites, roads, rivers, etc.

APPENDIX B—concluded.**EXPLANATORY NOTES—concluded.****Table VI.—Land Revenue—concluded.**

**Central Provinces
and Berar—contd.
(Pages 36—37,
38—39)**

Column 4 (a).—In Berar *Pat Kharab* lands are excluded from this column, which includes only, occupied lands available for cultivation.

Column 4 (b) excludes fallows in the Central Provinces. In Berar, it states the cultivated area in khalsa villages only.

Column 5.—The figures for the Central Provinces represent different items of land revenue for different districts, no uniform practice having been followed throughout the province. In Berar, the figures include the revenue derived from jagir, palampat, and izara villages. As regards the items of land revenue included, the practice has not been uniform, different districts having entered different items.

Column 8 for Berar shows assessment on occupied lands only, as stated in column 4(a).

Column 10.—The cultivated area included for the Central Provinces in this column is the fully assessed portion of the net sown area. In Berar, the incidence is calculated on the area entered in column 4 (b), that is, the cultivated area in khalsa villages only.

Column 11 excludes population of jagir and izara villages of Berar.

**Assam
(Pages 38-39)**

Column 1.—*Raiyatwari* includes, besides *raiyatwari* tenures, all unsettled Government waste and forest lands and areas in which house-tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under *Zamindari* (temporarily settled). *Zamindari* (temporarily settled) includes, besides temporarily settled *Zamindari* estates, fee-simple grants, wholly or partially revenue-free tenures, and grants under progressive assessment.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 1·164 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crop, etc.

Column 10.—The incidence has been calculated on the cultivated portion of the fully assessed area.

* *Column 11.*—The figures of population of fully assessed areas are estimates based upon village census registers.

**North-West Frontier
Province
(Pages 38-39)**

Columns 3 (a) and 3 (b) include villages receiving frontier remissions and *istamrari* tenures.

Column 4 (b) includes fully assessed current fallows which bore any crop in the preceding year.

Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue.

Column 10.—The incidence is calculated on the cultivated area excluding current fallows.

The table is prepared annually.

Column 1.—The khalsa area has been classed as "Zamindari and village communities (temporarily settled)" and the jagir and *istamrari* areas as "Zamindari (permanently settled)."

Column 4 includes in the case of the khalsa villages the assessed cultivated area including assessed fallows.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts.

Column 10.—The cultivated area is in the case of "Zamindari (temporarily settled)," the crop portion of the fully assessed area.

Column 11 excludes population of jagir villages.

**Ajmer-Merwara
(Pages 40-41)**

APPENDIX C.

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA.

Agasi, agati, or avati (*Sesbania grandiflora*)—A vegetable crop.

Ajmul (*Carum Roxburghianum*)—A kind of spice.

Ajwan (*Carum copticum*)—A kind of spice, “Bishop’s weed.”

Akurkura or jevandi (*Chrysanthemum coronarium*)—A non-food crop.

Amada or mamidi allam (*Curema amada*)—A condiment.

Ampazham (*spondias magnifera*)—The hog plum.

Arhar (*Cajanus indicus*)—The pigeon pea.

Arunelli (*Phyllanthus distichus*)—Country star gooseberry.

Bajra (*Pennisetum typhoideum*)—The spiked millet.

Band (Coorg)—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.

Barbati (*Vigna catjang*)—Asparagus, a food grain.

Barti (see Wudalu).

Bel (*Eggle Marmelos*)—A fruit.

Bhagilari (see Narvadari).

Bilimbi (*Averrhoa Bilimbi*)—A fruit.

Bimb (*Cephaelandra indica*)—A fruit.

Chaplash (*Artocarpus Chaplasha*)—A tree grown mainly for timber.

Chayroot (*Oldenlandia umbellata*)—A dye.

Cheena (*Panicum miliaceum*)—The common millet.

Cheik (*Coix lachryma-jobi*)—A food grain, “Job’s Tear.”

Chikkudukayalu (*Dolichos lablab*)—The Indian or popat bean.

Cholam (see Jowar).

Cholanathn (*Andropogon sorghum*)—Fodder jowar.

Chowli (see Barbati).

Cumlu (see Bajra).

Dani (*Nipa fruticans*)—A sabaliferous palm, the leaves of which are used for thatching purposes, also for matting.

Dao-tar—(Assam)—A tax levied in Sylhet upon male Tepperas who cultivate by jhamming.

Dhaincha (*Sesbania aculeata*)—A plant cultivated mainly for green manure.

Dhutnra (*Datura alba*)—A drug.

Dividivi (*Cesalpinia coriaria*)—A tanning material.

Dolois—(Assam)—The Headman of a group of villages in the Jowai Subdivision of the Khasi and Jaintia Hills district.

Gajar—Carrot.

Garmal (*Coleus barbatus*)—A fruit.

Gondli (see Kutki).

Gorait (United Provinces)—Village watchman.

Henna (*Lawsonia alba*)—A dye.

Inám (Madras)—Alienated villages or lands granted rent-free. *Whole inám* villages are entire villages held on such tenure; *minor ináms* are portions of villages, generally a number of fields, held on *inám* tenure.

—(Coorg)—A grant of land by Government as a reward for services rendered or for religious or charitable purposes.

Isfagul (*Plantago ovata*)—A drug.

Istamrdri (Punjab, Ajmer-Merwara)—A tenure which, though the revenue is assigned is charged with a permanently fixed quit-rent.

Izdfat (Bombay)—A form of service tenure.

Izdra (Berar)—Land leased under the waste-land rules on stipulated terms.

Jagir (Berar)—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.

—(Ajmer-Merwara)—Land granted revenue-free on condition of military service or as a charitable endowment.

—(Bombay)—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.

—(Coorg)—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.

Jambo or naval—Black plum.

APPENDIX C—continued.

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA—continued.

Jamma (Coorg)—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

Jenugulu—Asparagus.

Jinjili (*Sesamum indicum*)—An oilseed.

Jira—Caraway.

Jodi (Madras)—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths) of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.

Jowar (*Sorghum vulgare*)—The great millet.

Kalpayaru—Kidney bean.

Kangni (*Panicum italicum*)—Italian millet.

Kamranga (*Anerrhoa Carambola*)—A fruit.

Kanda (*Dracontium*)—A vegetable crop.

Kankrol (*Momordica cochinchinensis*)—A vegetable crop.

Karola (*Momordica Charantia*)—A vegetable crop.

Karuvapilai (*Murraya Koenigii*)—A condiment.

Karali (*Sterculia urens*)—The Indian katura, a fruit.

Karathu (*Dioscorea alata*)—A tuber used as a food stuff.

Khalsa (Bombay)—Government occupant or raiyatwari tenure.

— (Central Provinces)—Areas settled on malguzari or thekadari tenure, in contradistinction to zamindari.

— (Berar, Ajmer-Merwara)—Land paying full revenue to Government.

Khatedar (Berar)—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

Khiraj (Assam)—Land assessed to full revenue.

Khoti (Bombay)—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

Kirni (*Mimusops heterandra*)—A large tree cultivated chiefly in north-western India. It produces an olive-shaped yellow berry which is eaten chiefly during times of scarcity, and in the hot weather.

Kodo or *Kutki* (*Paspalum Scrobiculatum*)—A kind of millet.

Kolinji (*Tephrosia purpurea*)—A drug.

Koorka (*Strobilanthes*)—A vegetable crop.

Korai—The Indian matting sedge.

Kuhudi (*Panicum trypheron*)—A food grain.

Kulthi (*Dolichos biflorus*)—Horse gram.

Kutki (see *Kodo*).

Krin (Burma)—An area averaging about one square mile selected as a survey unit on account of some natural features or administrative boundaries.

Lakhiraj (Assam)—Revenue-free land.

Lobia (see *Barbati*).

Madder (*Rubia tinctorum* and *R. cordifolia*)—A dye.

Mahalkari (Bombay)—A revenue and police officer in charge of a sub-division of a taluk.

Makhan sim—The sword bean.

Malguzari (Central Provinces)—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.

Mamlatdar (Bombay)—The chief revenue and police officer (native) in charge of a taluk.

Mankachu (*Alocasia indica*)—A root crop.

Marur (*Rhusina curvicaulis*)—A kind of millet.

Marukkolundu (*Artemisia vulgaris*)—The Indian worm wood.

Mehwasi (Bombay)—A proprietary tenure assessable to revenue at a lump sum.

Miafi (Manipur)—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.

Mung (*Phaseolus Mungo*)—Green gram.

APPENDIX C—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA—continued

Munsarim (Berar)—A head native revenue officer.

Narnadari, Khagdari (Bombay)—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump and in the latter distributed by rates over fields.

Neem or Margosa (*Melia azadirachta*)—A non-food crop.

Neerali (*Gynocordia odorata*)—An oilseed.

Nela mulaka (*Solanum xanthocarpum*)—The bogoda brinjal, a drug.

Nisikhiraj (Assam)—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.

Odamula (*Ochlandra Rheedii*)—A reed.

Ol or zaminkand—The elephant foot, a root crop.

Palampat (Berar)—Land held on payment of a quit-rent, but not necessarily hereditary.

Panchayat (Bengal)—A committee of five respectable persons nominated or appointed by local officers of Government in a village or group of villages for the settlement of petty disputes among the people and for dealing with other small local matters, such as caste, occupation, sanitation, etc.

Papay (*Carica papaya*)—A fruit.

Parpatigar (Coorg)—A revenue officer in charge of a sub-division of a taluk.

Parvar (see *Patol*).

Patel (Coorg)—Village headman appointed by Government.

Patol (*Trichosanthes dioica*)—A vegetable crop.

Peshkash (Madras)—The fixed land revenue payable to Government on all permanently-settled estates.

Pimakottai or ponna—The mast wood.

Ponnagantikura (*Alternanthera sessilis*)—A vegetable crop.

Poramboke (Madras)—Lands reserved for public or village communal purposes.

Pôt inâms (Bombay)—Plots of alienated land in Khalsa villages.

Pôt kharâb (Berar)—The unculturable area included in a survey number.

Puliyavara (*Oxalis corniculata*)—A vegetable crop.

Ragi (see *Marua*).

Randhuni (see *Ajmud*).

Rayatwari—State lands leased to cultivators for a fixed term. A form of tenure in which the settlement of revenue is made by Government with each individual occupant or cultivator of the land for a given term, without the intervention of a third party.

Sabai grass (*Ischaemum Agnusifolium*)—A fibre plant.

Sauk-alu (*Pachyrhizus angulatus*)—A root crop.

Sapodilla (*Achras Sapota*)—A fruit.

Sebestan (*Cordia Myxa*)—A fruit.

Shanbag (Coorg)—A village accountant appointed by Government.

Shrotriem (Madras)—Village held on grant (originally to Brahmins), wholly or partially revenue-free.

Siris tree or vagai (*Albizia Lebbeck*)—A non-food crop.

Sorrell (*Rumex vesicarius*)—A vegetable crop.

Sother.—Radish.

Swank (*Panicum frumentaceum*)—A food grain.

Talukdari (Bombay)—A form of proprietary right in force in the northern districts of Bombay.

Tejjpat (*Cinnamomum Tamala* and *C. obtusifolium*)—A spice.

Thathameda (Upper Burma)—Household tax.

Thattan payara (see *Barbati*).

Thekadar (Central Provinces)—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.

Thotke grass (*Imperata arundinacea*)—A small perennial grass used chiefly for thatching purposes.

Thugyi (Burma)—A village headman.

APPENDIX C—concluded.

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL STATISTICS OF INDIA—concluded

Til (Sesamum indicum).—An oilseed.

Uchhe (Momordica muricata).—A vegetable crop.

Udai (Acacia eburnea).—A thorny tree used as fuel or for fencing purposes.

Uhad-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.

Umbli (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors

Unda (Pongamia glabra).—An oilseed.

Urad (Phaseolus radiatus).—Black gram.

Wudalu or barti (Panicum flavidum).—A food grain.

Zamindar.—The holder of an estate on a fixed assessment under a deed of permanent ownership granted by Government.

— (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Zamindari.—An estate held on a fixed assessment under a deed of permanent ownership granted by Government.

— (United Provinces).—An undivided estate held in joint tenure.

APPENDIX D

ALPHABETICAL LIST OF CROPS CULTIVATED IN INDIA AND THEIR CLASSIFICATION
IN TABLE IV

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Agasi, agati or avati	<i>Sesbania grandiflora</i>	40. Fruits and Vegetables including root crops.
Agave	<i>Agave spp.</i>	25. Fibres—others.
Aj mud or Randhuni	<i>Carmn Roxburghianum</i>	20. Condiments and spices.
Ajwau or Bishop's weed	<i>Carum Copticum</i>	20. " " "
Akrukura (<i>see Chrysanthemum</i>)
Al (<i>see Morinda</i>)
Aloes	<i>Aloe vera</i>	37. Drugs and Narcotics—others.
Alya (<i>see Cress</i>)
Amuda or Mamidi allam	<i>Circuma Amada</i>	20. Condiments and spices.
Amaranths	<i>Amarantus</i>	41. Misc. food crops.
Ampazham (<i>see Plum</i>)
Anise seed	<i>Pimpinella Anisum</i>	20. Condiments and spices.
Apple, wood	<i>Feronia elephantum</i>	40. Fruits and Vegetables including root crops
" Rose	<i>Engenia Jambos</i>	40. " " "
" Custard	<i>Annona squamosa</i> and <i>A. reticulata</i>	40. " " "
Areca nut or Betel nut	<i>Areca Catechu</i>	37. Drugs and Narcotics—others.
Arhar or pigeon pea	<i>Cajanus indicus</i>	10. Other food grains, etc.
Arnatto or Arnotto	<i>Bixa Orellana</i>	30. Dyes and Tanning Materials—others.
Arrowroot, West Indian	<i>Marcanta arundinacea</i>	41. Misc. food crops.
Wild or East Indian	<i>Circuma augu-tisolia</i>	41. " " "
Astichoke	<i>Cynara Scolymus</i> or <i>Centaury Cardunculus</i>	40. Fruits and Vegetables including root crops.
Arnm (edible), Kachu or Kachalu	<i>Colocasia Antiquorum</i>	40. " " "
Arnolli (<i>see Gooseberry, country star</i>)
Bajra (<i>see Millet</i>)
Barbati, Lobia, Jenugulu, Thattan-payara or Chowli (Asparagus)	<i>Vigna Catjang</i>	10. Other food grains, etc.
Barley	<i>Hordeum vulgare</i>	4. Barley.
Barti (<i>see Wudalu</i>)
Basil, sweet	<i>Ocimum Basilicum</i>	37. Drugs and Narcotics—others.
Beans	<i>Phaseolus lunatus</i>	40. Fruits and Vegetables including root crops.
" Asparagus (<i>see Barbati</i>)
" Sword or Makhan Sim	<i>Canavalia cuneiformis</i> , C. <i>gladiata</i>	40. Fruits and Vegetables including root crops.
" French	<i>Phaseolus vulgaris</i>	40. " " "
" Goa	<i>Psophocarpus tetragonolobus</i>	40. " " "
" Indian, Chikkudukayalu, or Popat	<i>Dolichos lablab</i>	40. " " "
" Kidney, Moth, or Kalpayarn	<i>Phaseolus aconitifolius</i>	40. " " "
" Soy	<i>Glycine hispida</i>	40. " " "
Beetroot	<i>Beta vulgaris</i>	40. " " "
Bel	<i>Ægle Marmelos</i>	40. " " "
Betel vine	<i>Piper Betle</i>	37. Drugs and Narcotics—others.
" nut (<i>see Are-canut</i>)
Bhindi (<i>see Hibiscus, edible</i>)
Bilimbi	<i>Averrhoa Bilimbi</i>	40. Fruits and Vegetables including root crops.
Bimb	<i>Cephalandra indica</i>	40. " " "
Bishop's weed (<i>see Ajwan</i>)
Borage, country	<i>Coleus aromaticus</i>	37. Drugs and Narcotics—others.
Brinjal	<i>Solanum Melongena</i> , S. <i>longum</i>	40. Fruits and Vegetables including root crops
" bogoda or nela mulaka	<i>Solanum xanthocarpum</i>	37. Drugs and Narcotics—others.
Buck wheat (<i>see Wheat</i>)

APPENDIX D—continued.

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Botanical	Heads of classification in Table IV
English or Vernacular			
Cabbage	.	<i>Brassica oleracea</i>	40. Fruits and Vegetables including root crops.
Caraway or Jira	.	<i>Carum Carui</i>	20. Condiments and spices.
" Black or Shahjira	.	<i>Carmi Bulboestanum</i>	20. " " "
Cardamom Aromatic	.	<i>Amomum aromaticum</i>	20. " " "
" greater	.	<i>subulatum</i>	20. " " "
" lesser	.	<i>Elettaria Cardamomum</i>	20. " " "
Carob or Locust tree	.	<i>Ceratonia Siliqua</i>	39. Fodder crops.
Carrot or Gajar	.	<i>Daucus Carota</i>	40. Fruits and Vegetables including root crops.
Cashew nut	.	<i>Anacardium occidentale</i>	40. " " "
Cassava	.	<i>Manihot utilissima</i> and <i>M. palmata</i>	40. " " "
Castor	.	<i>Ricinus communis</i>	17. Castor.
Cauliflower	.	<i>Brassica oleracea</i>	40. Fruits and Vegetables including root crops.
Celery	.	<i>Apium graveolens</i>	40. " " "
Chaplash (see Sam tree)	30. Dyes and Tanning Materials—others.
Chayroot	.	<i>Oldenlandia umbellata</i>
Cheena (see Millet)
Cheik (see Job's Tear)
Chicory	.	<i>Cichorium Intybus</i>	40. Fruits and Vegetables including root crops.
Chickling Vetch (see Vetch)
Chillies	.	<i>Capsicum sp.</i>	20. Condiments and spices.
Chikkudukayalu (see Beans, Indian)
Cholom (see Millet)
Cholanathu (fodder Cholom)	.	<i>Andropogon Sorghum</i>	39. Fodder crops.
Chowli (see Barbati)
Chrysanthemum, Akurkura, or Jevandi	.	<i>Chrysanthemum coronarium</i>	42. Miscellaneous non-food crops.
Cinchona	.	<i>Cinchona sp.</i>	35. Cinchona.
Cinnamon	.	<i>Cinnamomum zeylanicum</i>	20. Condiments and spices.
Citron or lime or lemon	.	<i>Citrus medica</i>	40. Fruits and Vegetables including root crops.
Cloves	.	<i>Engenia caryophyllata</i> or <i>Caryophyllus aromaticus</i>	20. Condiments and spices.
Coconut	.	<i>Cocos nucifera</i>	16. Coconut.
Coffee	.	<i>Coffea arabica</i>	32. Coffee.
Coriander	.	<i>Coriandrum sativum</i>	20. Condiments and spices.
Cotton	:	<i>Gossypium sp.</i>	23. Cotton.
Cress	.	<i>Lepidium sativum</i>	40. Fruits and Vegetables including root crops.
Cucumber	.	<i>Cucumis sativus</i>	40. " " "
Cumbo (see Millet)
Cumin	.	<i>Cuminum Cymimum</i>	20. Condiments and spices.
Custard Apple (see Apple)
Dani	.	<i>Nipa fruticans</i>	42. Miscellaneous non-food crops.
Date palm (see Palm)
Dlinincha	.	<i>Sesbania aculeata</i>	42. Miscellaneous non-food crops.
Dhatura	.	<i>Datura alba</i>	37. Drugs and Narcotics—others
Dill or Sowa	.	<i>Peucedanum graveolens</i>	18. Oilseeds—others.
Dividivi	.	<i>Caesalpinia coriara</i>	30. Dyes and Tanning Materials—others.
Drumsticks or Horse-radish	.	<i>Moringa pterygosperma</i>	40. Fruits and Vegetables including root crops.
Elephant foot, Zaminkand or Ol	.	<i>Amorphophallus campanulatus</i>	40. " " "
Elephant yam	.	<i>Tryphonium trilobatum</i>	40. " " "
Fennel	.	<i>Foeniculum vulgare</i>	20. Condiments and spices.

APPENDIX D—continued.

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP.		Heads of classification in Table IV.
English or Vernacular.	Botanical.	
Fennugreek	<i>Trigonella foenum graecum</i>	20. Condiments and spices.
Field Vetch (<i>see</i> Vetch)	<i>Ficus Carica</i>	40. Fruits and Vegetables including root crops.
Fig	<i>Vernonia anthelmintica</i>	37. Drugs and Narcotics—others.
Flea-bane, purple	42. Miscellaneous non-food crops.
Flowers
Gajar (<i>see</i> Carrot)	<i>Allium sativum</i>	20. Condiments and spices.
Garlic	<i>Coleus barbatus</i>	40. Fruits and Vegetables including root crops.
Garinal
Gawar (<i>see</i> Veteh)	<i>Zingiber officinale</i>	20. Condiments and spices.
Ginger
Goa bean (<i>see</i> Bean)	<i>Physalis peruviana</i>	40. Fruits and Vegetables including root crops.
Gondi (<i>see</i> Millet)	<i>Phyllanthus distichus</i>	40. " " " "
Gooseberry, Cape—or tepari	<i>Chenopodium album</i>	40. " " " "
" Country star or Arunelli	<i>Trichosanthes anguina</i>	40. " " " "
Goose foot	<i>Lagenaria vulgaris</i>	40. " " " "
Gourd, Snake	<i>Luffa acutangula</i>	40. " " " "
" Bottle	<i>Cucurbita maxima</i>	40. " " " "
" Towel	<i>Benincasa cerifera</i>	40. " " " "
" Red or melon pumpkin	<i>Cicer arietinum</i>	9. Gram.
" Melon, white	<i>Phaseolus trilobus</i>	10. Other food grains, etc.
Gram	<i>Phaseolus Mungo</i>	10. " " " "
" Field	<i>Dolichos biflorus</i>	10. " " " "
" Green or Mung	<i>Phaseolus radiatus</i>	10. " " " "
" Horse or Kalthi	<i>Vitis vinifera</i>	40. Fruits and Vegetables including root crops.
" Black or Urad (<i>Matikulai</i>)	<i>Arachis hypogaea</i>	15. Groundnut.
Grape	<i>Psidium Guajava</i>	40. Fruits and Vegetables including root crops.
Groundnut	<i>Panicum maximum</i>	39. Fodder crops.
Guava	<i>Cordia Rothii</i>	40. Fruits and Vegetables including root crops.
Guinea grass'	<i>Cannabis sativa</i>	36. Indian Hemp.
Gumberly	<i>Crotalaria juncea</i>	25. Fibres—others.
Hemp, Indian, or Ganja	<i>Hibiscus cannabinus</i>	25. " " "
" Sunn	<i>Agave sisalana</i>	25. " " "
" Deccan	<i>Lawsonia alba</i>	30. Dyes and Tanning Materials—others.
Henna	<i>Hibiscus esculentus</i>	40. Fruits and Vegetables including root crops.
Hibiscus, edible or bhindi
Horse-radish (<i>see</i> Drumsticks)
Indian Hemp (<i>see</i> Hemp)
Indian worm wood (<i>see</i> Marukkolundu)
Indigo	<i>Indigofera sumatrana</i> and <i>I. arrecta</i>	29. Indigo.
Isafgul	<i>Plantago ovata</i>	37. Drugs and Narcotics—others.
Jack fruit	<i>Artocarpus integrifolia</i>	40. Fruits and Vegetables including root crops.
Jambotree (<i>see</i> Plum, black)
Jenugulu (<i>see</i> Barbatii)
Jevandi (<i>see</i> Chrysanthemum)
Jinjili (<i>see</i> Sesamum)
Jira (<i>see</i> Caraway)
Job's Tear or Cheik	<i>Coix laohryma-jobi</i>	10. Other food grains, etc.
Jowar (<i>see</i> Millet)

APPENDIX D—continued.

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table IV.
English or Vernacular	Botanical	
Jujube	Zizyphus Jujuba . . .	40. Fruits and Vegetables including root crops.
Jute	Corchorus sp. . . .	24. Jute.
Kachu or Kachalu (see Arum)
Kakri (see Melon)
Kalpayaru (see Beans, Kidney)
Kamrangai	Averrhoa Carambola . . .	40. Fruits and Vegetables including root crops.
Kanda	Dracontium	40. " "
Kangni (see Millet)	Momordica cochinchinensis . . .	40. Fruits and Vegetables including root crops.
Kankrol
Kaon (see Millet)	Eriodendron anfractuosum . . .	25. Fibres—others.
Kapok	Momordica Charantia . . .	40. Fruits and Vegetables including root crops
Karola
Karuvapilai	Murraya Koenigii . . .	20. Condiments and spices;
Kavali or Indian Katura	Sterculia urens . . .	40. Fruits and Vegetables including root crops.
Kavathu, pannikkavathu, pallakkavathu, kolkavathu	Dioscorea alata . . .	40. " " ,
Kharbuja (see Melon)
Khesari (see Vetch)
Khurfa (see Purslane)
Kidney bean (see Bean)
Kirni	Mimusops hexandra . . .	41. Miscellaneous food crops.
Kodo (see Millet)
Kornai (see Matting sedge, Indian)
Kokam (see Mangosteen)
Kolinji or vempali	Tephrosia purpurea . . .	37. Drugs and Narcotics—others.
Koorka	Strobilanthes	40. Fruits and Vegetables including root crops.
Kuhudi	Panicum trypheron . . .	10. Other food grains, etc.
Kulthi (see Gram)
Kutki (see Millet)
Lemon (see Citron)
Lentils	Lens esculenta or Ervam lens . . .	10. Other food grains, etc.
Lettuce	Lactuca Scariola . . .	40. Fruits and Vegetables including root crops.
Lime (see Citron)
Linseed	Linum usitatissimum . . .	12. Linseed.
Lobia (see Barbati)
Locust tree (see Carob)
Lucerne	Medicago sativa	39. Fodder crops.
Madder	Rubia tinctorum and R. cordifolia. . .	30. Dyes and Tanning Materials—others.
Mahua	Bassia latifolia and B. longifolia. . .	41. Miscellaneous food crops.
Maize	Zea Mays	8. Maize.
Makham Sim (see Beans, Sword)
Mango	Mangifera indica	40. Fruits and Vegetables including root crops.
Mangosteen or Kokam	Garcinia indica	40. " " "
Mankaehu	Alocasia indica	40. " " "
Margosa or Neem tree	Melia azadirachta	42. Miscellaneous non-food crops.
Marians	Bouea burmanica	40. Fruits and Vegetables including root crops.
Marjoram	Origanum vulgare	20. Condiments and spices.
Marua (see Millet)
Marukkolundu or Indian wormwood	Artemisia vulgaris	42. Miscellaneous non-food crops.

APPENDIX D--continued.

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP.			HEADS OF CLASSIFICATION IN TABLE IV.
ENGLISH OR VERNACULAR.	BOTANICAL.		
Mast wood	<i>Calophyllum inophyllum</i> .	18. Oilseeds—others.	
Mati kalai (<i>see</i> Black gram)	
Matting sedge, Indian or Korni	<i>Cyperus eorymbosus</i> , C. <i>tegetum</i> . .	25. Fibres—others.	
Medlar, Indian	<i>Vangueria edulis</i> .	40. Fruits and Vegetables including root crops.	
Melon, Kharbuja	<i>Cucumis Melo</i> .	40. " " "	
" Kakri	<i>Cucumis Melo</i> var. <i>momordica</i> . .	40. " " "

NAME OF CROP.		Heads of classification in Table IV.
English or Vernacular.	Botanical.	
Pomegranate	<i>Punica granatum</i> . . .	40. Fruits and Vegetables including root crops.
Pomelo	<i>Citrus decumana</i> . . .	40. " " "
Ponnagantikura	<i>Alternanthera sessilis</i> . . .	40. " " "
Potato	<i>Solanum tuberosum</i> . . .	40. " " "
" Sweet	<i>Ipomoea Batatas, Batatas edulis.</i> . . .	40. " " "
Pudina (see Mint)	<i>Oxalis corniculata</i> . . .	40. Fruits and Vegetables including root crops.
Puliyavara	<i>Cucurbita pepo</i> . . .	40. " " "
Pumpkin	<i>Raphanus sativus</i> . . .	40. Fruits and Vegetables including root crops.
Pumpkin Melon (see Gourd red)
Radish or Sother
Ragi (see Millet)
Randhuni (see Ajmud)	<i>Brassica sp</i> . . .	14. Rape and Mustard.
Rapeseed	<i>Rubus lasiocarpus</i> . . .	40. Fruits and Vegetables including root crops.
Raspberry	25. Fibres—others.
Rhea	<i>Bœhmeria nivea</i> . . .	2. Rice.
Rice	<i>Oryza sativa</i> . . .	40. Fruits and Vegetables including root crops.
Rose apple (see Apple)	<i>Hibiscus subdariffa</i> . . .	42. Miscellaneous non-food crops.
Roselle	<i>Hevea brasiliensis, manihot Glaziovii.</i> . . .	25. Fibres—others.
Rubber (India)	<i>Ischænum augustifolium</i> . . .	30. Dyes and Tanning Materials—others.
Sabai grass	<i>Carthamus tinctorius</i> . . .	30. Condiments and spices.
Safflower	42. Miscellaneous non-food crops.
Saffron	<i>Crocus sativus</i> . . .	40. " " "
Sage	<i>Salvia officinalis</i> . . .	40. Fruits and Vegetables including root crops.
Sam tree or Chaplash	<i>Artocarpus Chaplasha</i> . . .	37. Drugs and Narcotics—others.
Sank-alu	<i>Pachyrhizus angulatus</i> . . .	13. Sesamum.
Sapodilla	<i>Achras Sapota</i> . . .	40. " " "
Sawan (see Swank)	<i>Cordia myxa</i> . . .	40. " " "
Sehestan	<i>Cassia angustifolia</i> and <i>C. ovata.</i> . . .	40. Fruits and Vegetables including root crops.
Senna	<i>Sesamum indicum</i> . . .	37. Drugs and Narcotics—others.
Sesamum, til or jinjili
Shahjira (see Caraway, black)	<i>Trapa bispinosa</i> . . .	40. " " "
Shama (see Swank)	<i>Albizzia Lebbek</i> . . .	40. Fruits and Vegetables including root crops.
Singhara or water caltrop	<i>Sapindus trifoliatus</i> . . .	42. Miscellaneous non-food crops.
Siris tree or vagai	<i>Rumex vesicarius</i> . . .	37. Drugs and Narcotics—others.
Sisal hemp (see Hemp)
Soapnut or Kumkudu-Kaya
Sorguja (see Niger seed)	40. Fruits and Vegetables including root crops.
Sorrell
Sowa (see Dill)
Sother (see Radish)
Soy bean (see Bean)
Spelt wheat (see Wheat)	<i>Spinacea oleracea</i> . . .	40. Fruits and Vegetables including root crops.
Spinach	<i>Basella alba</i> . . .	40. " " "
" Indian or poi	<i>Atriplex hortensis</i> . . .	40. " " "
" Mountain, or Garden Orache	<i>Fragaria vesca</i> . . .	40. " " "
Strawberry	<i>Saccharum officinarum</i> . . .	21. Sugarcane.

APPENDIX D—concluded.

ALPHABETICAL LIST OF CROPS—concl'd.

NAME OF CROP		Botanical	Heads of classification in Table IV.
English or Vernacular			
Sunflower	Helianthus Annuus .	18. Oilseeds—others.
Swallow-wort	Calotropis sp. . .	25. Fibres—others.
Swank, Sawan, or Shama	Panicum frumentaceum .	10. Other food grains, etc.
Sweet flag	Acorus Calamus .	37. Drugs and Narcotics— others.
Sweet potato (<i>see</i> Potato)
Tamarind	Tamarindus indica .	20. Condiments and spices.
„ Manila	Pithecellobium dulce .	40. Fruits and Vegetables including root crops.
Taramira	Eruca sativa . . .	14. Rape and Mustard.
Tea	Camellia Thea .	33. Tea.
Tejpat	Cinnamomum Tamala and C. obtusifolium.	20. Condiments and spices.
Tepari (<i>see</i> Gooseberry)
Thattan-payara (<i>see</i> Barbati)
Thetkè (grass)	Imperata arundinacea .	42. Miscellaneous non-food crops.
Til (<i>see</i> Sesamum)
Tobacco	Nicotiana Tabacum and N. Rustica.	34. Tobacco.
Tomato	Lycopersicum esculentum .	40. Fruits and Vegetables including root crops.
Tori, Toria	Brassica Napus .	14. Rape and Mustard.
Turmeric	Cureuma longa .	20. Condiments and spices.
Turnip	Brassica Rapa .	40. Fruits and Vegetables including root crops.
Uchhe	Momordica muricata .	40.
Udai	Acacia eburnea .	42. Miscellaneous "non-food crops.
Unda	Pongamia glabra .	18. Oilseeds—others.
Urad (<i>see</i> Gram)
Varagu (<i>see</i> Millet)
Vagai (<i>see</i> Siris tree)
Vempali (<i>see</i> Kolinji)
Vetch, Field or gawar Chickling or khesari	Cyamopsis psorlioides .	39. Fodder crops.
Water caltrop (<i>see</i> Singhara) „ melon (<i>see</i> Melon)	Lathyrus sativus .	10. Other food grains, etc.
Wheat
„ Buck	Triticum sativum .	3. Wheat.
„ Spelt	Fagopyrum esculentum .	10. Other food grains, etc.
Wood apple (<i>see</i> Apple)	Triticum sativum var Spelta.	3. Wheat.
Widalu or barti	Panicum flavidum .	10. Other food grains, etc.
Yams	Dioscorea sp. . .	40. Fruits and Vegetables including root crops.
Zaminkand (<i>see</i> Elephant foot)
